Annual Financial Statements Years ended August 31, 2012 and 2011

Independent Auditor's Report

To the Shareholders of Melkior Resources Inc.

Raymond Chabot Grant Thornton LLP Place du Québec 888 3rd Avenue Vald'Or, Quebec J9P 5E6

Telephone: 819-825-6226 Fax: 819-825-1461 www.rcgt.com

We have audited the accompanying financial statements of Melkior Resources Inc., which comprise the statements of financial position as at August 31, 2012 and 2011 and as at September 1, 2010 and the statements of comprehensive income, the statements of changes in equity and the statements of cash flows for the years ended August 31, 2012 and 2011 and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Melkior Resources Inc. as at August 31, 2012 and 2011 and September 1, 2010 and its financial performance and its cash flows for the years ended August 31, 2012 and 2011 in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 1 in the financial statements which indicates that the Company has not generated any income or cash flows from operations and the Company's deficit amount to \$33,501,379 as at August 31, 2012. These conditions, along with other matters as set forth in Note 1, indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

The accompanying notes are an integral part of the financial statements.

1. General information, nature of operations and going concern

Melkior Resources Inc. (the "Company"), incorporated under the Canada Business Corporations Act, is a junior mining exploration company operating in Canada. The address of registered office is 1801, McGill College avenue, suite 1325, Montreal, Quebec, H3A 2N4. The principal place of business is 3208 Richmond Road, Ottawa, Ontario, K2H 5B6, Canada. The Company's shares are listed on the TSX Venture Exchange under the symbol MKR.

The financial statements have been prepared in compliance with International Financial Reporting Standards ("IFRS") and on the basis of the going concern assumption, meaning the Company will be able to realize its assets and discharge its liabilities in the normal course of operations.

Given that the Company has not yet determined whether its mineral properties contain mineral deposits that are economically recoverable, the Company has not yet generated income nor cash flows from its operations. As at August 31, 2012, the Company has a deficit of \$33,501,379 (\$31,260,833 as at August 31, 2011). These material uncertainties cast a significant doubt regarding the Company's going concern.

The Company's ability to continue as a going concern is dependent upon its ability to raise additional financing to further explore its mineral properties. Even if the Company has been successful in the past in doing so, there is no assurance that it will manage to obtain additional financing in the future.

The carrying amounts of assets, liabilities and expenses presented in the financial statements and the classification used in the statement of financial position have not been adjusted as would be required if the going concern assumption was not appropriate.

2. Summary of accounting policies

The significant accounting policies used in the preparation of these financial statements are described below.

a) Basis of preparation and compliance with IFRS

The Company's financial statements were previously prepared in accordance with Canadian generally accepted accounting principles ("Previous GAAP") as set out in the Handbook of the Canadian Institute of Chartered Accountants ("CICA Handbook"). In 2010, the CICA Handbook was revised to incorporate IFRS, and require publicly accountable enterprises to apply such standards effective for years beginning on or after January 1, 2011. Accordingly, these year end financial statements have been prepared in accordance with IFRS. In the financial statements, the term "Previous GAAP" refers to Canadian GAAP before the adoption of IFRS.

The financial statements have been prepared using accounting policies specified by those IFRS that are in effect at August 31, 2012.

These accounting policies have been used throughout all periods presented in the financial statements, except where the Company has applied certain accounting policies and exemptions upon transition to IFRS. The exemptions applied by the Company and the effects of transition to IFRS are presented in Note 14.

b) Presentation of financial statements in accordance with IAS 1

The financial statements are presented in accordance with IAS 1, *Presentation of Financial Statements*. The Company has elected to present the statement of comprehensive income in a single statement.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

2. Summary of significant accounting policies (Cont'd)

In accordance with IFRS 1, *First-time adoption of international financial reporting standards*, the Company presents three statements of financial position in its first IFRS financial statements. In future years, IAS 1 requires two comparative periods to be presented for the statement of financial position only in certain circumstances.

c) Basis of evaluation

These financial statements are prepared using the historical cost method, except for the listed shares which are measured at fair value.

d) Standards issued that are not yet effective but have been early adopted by the Company

In the current year, the Company has applied *IFRS 9 Financial Instruments* ("IFRS 9") (as issued in November 2009 and revised in October 2010) and the related consequential amendments in advance of their effective dates. The date of initial application (i.e. the date on which the Company has assessed its existing financial assets and financial liabilities) is September 1, 2010. The Company has applied IFRS 9 in accordance with the transitional provisions set out in IFRS 9; the Company has applied the requirements of IFRS 9 to instruments that have not been derecognized as at September 1, 2010 and has not applied the requirements to instruments that have already been derecognized as at September 1, 2010. Comparative amounts in relation to instruments that have not been derecognized as at September 1, 2010 have been restated, where applicable.

IFRS 9 introduces new classification and measurement requirements for financial assets that are within the scope of IAS 39, Financial Instruments: Recognition and Measurement. Specifically, IFRS 9 requires all financial assets to be classified and subsequently measured at either amortized cost or fair value on the basis of the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.

As required by IFRS 9, financial assets are measured at amortized cost only if (i) the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows and (ii) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. If either of the two criteria is not met, the financial assets are classified as at fair value through profit or loss ("FVTPL").

However, the Company may choose at initial recognition to designate a financial asset that meets the amortized cost criteria as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch. In the current year, the Company has not elected to designate any financial instruments to be classified as at FVTPL.

Financial instruments that are subsequently measured at amortized cost are subject to impairment.

Investments in equity instruments are classified and measured as at FVTPL except when the equity investment is not held for trading and is designated by the Company as at fair value through other comprehensive income (FVTOCI). If the equity investment is designated as at FVTOCI, all gains and losses, except dividend income that is generally recognized in profit or loss in accordance with IAS 18, Revenue, are recognized in other comprehensive income and are not subsequently reclassified to profit or loss.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

2. Summary of significant accounting policies (Cont'd)

IFRS 9 also contains requirements for the classification and measurement of financial liabilities. One major change in the classification and measurement of financial liabilities relates to the accounting for changes in fair value of a financial liability (designated as at fair value through profit or loss) attributable to changes in the credit risk of that liability.

As at September 1, 2010, the directors have reviewed and assessed the Company's existing financial assets and liabilities. The initial application of IFRS 9 has had no impact on financial assets and liabilities.

e) Functional and presentation currency

The financial statements are presented in Canadian currency which is also the functional currency of the Company.

f) Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognized when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and all substantial risks and rewards are transferred. A financial liability is derecognized when it is extinguished, discharged, cancelled or when it expires.

Financial assets and liabilities are initially measured and recognized at their fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and liabilities (other than financial assets and liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial asset and liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or liabilities at fair value through profit or loss.

Financial assets

Financial assets that meet the following conditions are subsequently measured at amortized cost less impairment loss (except for financial assets that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at fair value.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

2. Summary of significant accounting policies (Cont'd)

Amortized cost and effective interest method

Income is recognized on an effective interest basis for financial assets measured subsequently at amortized cost. Interest income is recognized in profit or loss and is included in the interest income line item. Discounting is omitted where the effect of discounting is immaterial.

Cash, short term investments, other receivables and due from partners are measured at amortized cost using the effective interest method.

Financial assets at fair value through profit or loss ("FVTPL")

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in profit or loss. The net gain or loss recognized in profit or loss is included in the 'fair value variation on financial instruments' line item. Fair value of listed shares is based on the last bid price on the stock market at the end of the year.

Financial assets are reclassified from amortized cost to FVTPL when the business model is changed such that the amortized cost criteria are no longer met. Reclassification of financial assets that are designated as at FVTPL on initial recognition is not allowed.

Dividend income on investments in equity instruments at FVTPL is recognized in profit or loss when the Company's right to receive the dividends is established in accordance with IAS 18, Revenue, and is included in dividend income line.

The Company's listed shares fall into this category of financial instruments.

Financial liabilities

Financial liabilities are subsequently measured at amortized cost using the effective interest method, except for:

- financial liabilities at fair value through profit or loss. Such liabilities, including derivatives that are liabilities, shall be subsequently measured at fair value.
- financial liabilities that arise when a transfer of a financial asset does not qualify for derecognizing or when the continuing involvement approach applies.

Accounts payable and accrued liabilities and due to partners are measured at amortized cost using the effective interest method.

Impairment of financial assets

All financial assets, except for those at fair value through profit or loss, are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is any objective evidence that a financial asset or a group of financial assets is impaired.

Objective evidence of impairment could include:

- significant financial difficulty of the issuer of counterparty;
- default or delinquency in interest of principal payments; or
- it becoming probable that the borrower will enter in bankruptcy or financial reorganization.

Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received that a specific counterparty will default. Impairment of receivables are presented in profit or loss within allowance for losses on receivable if applicable.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

2. Summary of significant accounting policies (Cont'd)

g) Basic and diluted loss per share

Basic loss per share is calculated by dividing the loss attributable to common equity holders of the Company by the weighted average number of ordinary shares outstanding during the period. Diluted earnings per share is calculated by adjusting loss attributable to ordinary equity holders of the Company, and the weighted average number of ordinary shares outstanding, for the effects of all dilutive potential ordinary shares which include options and warrants. Dilutive potential ordinary shares shall be deemed to have been converted into ordinary shares at the average market price at the beginning of the year or, if later, at the date of issue of the potential ordinary shares.

h) Taxes credits receivable

The Company is entitled to a refundable tax credit on qualified exploration expenditures incurred and refundable credit on duties for losses under the Mining Tax Act. These tax credits are recognized as a reduction of the exploration costs incurred.

i) Exploration and evaluation assets

Exploration and evaluation ("E&E") expenses are costs incurred in the course of initial search for mineral resources before the technical feasibility and commercial viability of extracting a mineral resource are demonstrable. Costs incurred before the legal right to undertake E&E activities are recognized in profit or loss when they are incurred.

Once the legal right to undertake E&E activities has been obtained, all costs of acquiring mineral rights, expenses related to the E&E of mining properties less refundable tax credits related to these expenses are recognized as E&E assets. Expenses related to E&E include topographical, geological, geochemical and geophysical studies, exploration drilling, trenching, sampling and other costs related to the evaluation of the technical feasibility and commercial viability of extracting a mineral resource. The various costs are capitalized on a property-by-property basis pending determination of the technical feasibility and commercial viability of extracting a mineral resource. These assets are recognized as intangible assets and are carried at cost less any accumulated impairment losses. No depreciation expenses are recognized for these assets during the E&E phase.

Whenever a mining property is considered no longer viable, or is abandoned, the capitalized amounts are written down to their recoverable amounts; the difference is then immediately recognized in profit or loss.

When technical feasibility and commercial viability of extracting a mineral resource are demonstrable, E&E assets related to the mining property are transferred to property and equipment in mining assets under construction. Before the reclassification, E&E assets are tested for impairment and any impairment loss is recognized in profit or loss before reclassification.

To date, neither the technical feasibility nor the commercial viability of a mineral resource has been demonstrated.

Although the Company has taken steps to verify title to the mining properties in which it holds an interest, in accordance with industry practices for the current stage of exploration and development of such properties, however these procedures do not guarantee the validity of the Company's titles. Property titles may be subject to unregistered prior agreements and non-compliance with regulatory requirements.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

2. Summary of significant accounting policies (Cont'd)

On the disposal of interest in connection with options agreement, the Company does not recognize expenses related to E&E performed on the property by the acquirer. Proceeds on the sale of exploration properties are applied by property in reduction of the mining properties, then in reduction of the E&E expenses and any residual is recorded in the statement of comprehensive income unless there is contractual work required in which case the residual gain is deferred and will reduce the contractual disbursements when done.

Funds received from partners on certain properties where the Company is the operator in order to perform exploration work as per agreements, are accounted for in the statement of financial position as advances received for exploration work. These advances are reduced gradually when the exploration works are performed. The project management fees received when the Company is the operator are recorded in the statement of comprehensive income. When the partner is the operator, the management fees are recorded in the statement of financial position as E&E expenses.

j) Operating lease agreements

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments under an operating lease are charged to the statement of comprehensive income or capitalized in the exploration and evaluation assets on a straight-line basis over the period of the lease. Related expenses, such as maintenance and insurance expenses, are charged as incurred.

k) Impairment of exploration and evaluation assets

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are largely independent cash inflows (cash-generating units). As a result, some assets are tested individually for impairment and some are tested at a cash-generating unit level. Whenever events or changes in circumstances indicate that the carrying amount may not be recoverable, an asset or cash-generating unit is reviewed for impairment.

Impairment reviews for exploration and evaluation assets are carried out on a project by project basis, with each project representing a potential single cash generating unit. An impairment review is undertaken when indicators of impairment arise, but typically when one of the following circumstances apply:

- the right to explore the areas has expired or will expire in the near future with no expectation of renewal;
- no further exploration or evaluation expenditures in the area are planned or budgeted;
- no commercially viable deposits have been discovered, and the decision has been made to discontinue exploration in the area;
- sufficient work has been performed to indicate that the carrying amount of the expenditure carried as an asset will not be fully recovered.

Additionally, when technical feasibility and commercial viability of extracting a mineral resource are demonstrable, the exploration and evaluation assets of the related mining property are tested for impairment before these items are transferred to property and equipment.

An impairment loss is recognized in profit or loss for the amount by which the asset's or cashgenerating unit's carrying amount exceeds its recoverable amount. The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less cost to sell and its value in use. An impairment charge is reversed if the asset's or cash-generating unit's recoverable amount exceeds its carrying amount. All impairment charges (or reversals, if any) are included within write-off (recovery) of E&E assets in profit or loss.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

2. Summary of significant accounting policies (Cont'd)

I) Provisions and contingent liabilities

Provisions are recognized when present obligations as a result of a past event will probably lead to an outflow of economic resources from the Company and amounts can be estimated reliably. Timing or amount of the outflow may still be uncertain. Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the reporting date, including the risks and uncertainties associated with the present obligation. Provisions are discounted when the time value of money is significant.

The Company's operations are governed by government environment protection legislation. Environmental consequences are difficult to identify in terms of amounts, timetable and impact. As of the reporting date, management believes that the Company's operations are in compliance with current laws and regulations. Site restoration costs currently incurred are negligible. When the technical feasibility and commercial viability of extracting a mineral resource have been demonstrated, a restoration provision will be recognized in the cost of the mining property when there is constructive commitment that has resulted from past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and the amount of the obligation can be measured with sufficient reliability.

In those cases where the possible outflow of economic resources as a result of present obligations is considered improbable or remote, no liability is recognized, unless it was assumed in the course of a business combination.

All provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

m) Income taxes

Tax expense recognized in profit or loss comprises the sum of deferred tax and current tax not recognized in other comprehensive income or directly in equity. Current income tax assets and/or liabilities comprise those obligations to, or claims from, fiscal authorities relating to the current or prior reporting periods, that are unpaid at the reporting date. Current tax is payable on taxable profit, which differs from profit or loss in the financial statements. Calculation of current tax is based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period.

However, since the Company is in exploration phase and has no taxable income, tax expense recognized in profit or loss is currently comprised only of deferred tax.

Deferred income taxes are calculated using the liability method on temporary differences between the carrying amounts of assets and liabilities and their tax bases. However, deferred tax is not provided on the initial recognition of goodwill or on the initial recognition of an asset or liability unless the related transaction is a business combination or affects tax or accounting profit. Deferred tax on temporary differences associated with shares in subsidiaries and joint ventures is not provided if reversal of these temporary differences can be controlled by the Company and it is probable that reversal will not occur in the foreseeable future.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

2. Summary of significant accounting policies (Cont'd)

Deferred tax assets and liabilities are calculated, without discounting, at tax rates that are expected to apply to their respective period of realization, provided they are enacted or substantively enacted by the end of the reporting period. Deferred tax assets are recognized to the extent that it is probable that they will be able to be utilized against future taxable income. Deferred tax liabilities are always provided for in full. Deferred tax assets and liabilities are offset only when the Company has a right and intention to set off current tax assets and liabilities from the same taxation authority.

Changes in deferred tax assets or liabilities are recognized as deferred income tax in profit or loss, except where they relate to items that are recognized in other comprehensive income or directly in equity, in which case the related deferred tax is also recognized in other comprehensive income or equity, respectively.

n) Equity

Share capital represents the amount received on the issue of shares. If shares are issued when options and warrants are exercised, the share capital account also comprises the compensation costs previously recorded as contributed surplus. In addition, if shares were issued as consideration for the acquisition of a mineral property or some other form of non-monetary assets, they were measured at their fair value according to the quoted price on the day of the conclusion of the agreement.

Unit placements

Proceeds from unit placements are allocated between shares and warrants issued using the residual method. Proceeds are first allocated to shares according to the quoted price of existing shares at the time of issuance and any residual in the proceeds is allocated to warrants.

Flow-through placements

Issuance of flow-through units represents in substance an issue of common shares, warrants and the sale of the right to tax deductions to the investors. When the flow-through shares are issued, the sale of the right to tax deductions is deferred and presented as other liabilities in the statement of financial position. The proceeds received from flow-through units are allocated between share capital, warrants and the liability using the residual method. Proceeds are first allocated to shares according to the quoted price of existing shares at the time of issuance and then to warrants according to the fair value of the warrants at the time of issuance and any residual in the proceeds is allocated to the liability. The fair value of the warrants is established using the Black-Scholes valuation model. When eligible expenses are incurred and the Company has the intention to renounce its right to tax deductions to the investors, the amount recognized in other liabilities is reversed and is recognized for the taxable temporary difference that arises from the difference between the carrying amount of eligible expenditures capitalized as an asset and its tax basis.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

2. Summary of significant accounting policies (Cont'd)

Other elements of equity

Contributed surplus includes charges related to share options and warrants. When share options and warrants are exercised, the related compensation cost is transferred to share capital. Retained deficit includes all current and prior period retained profits or losses, less issuance costs, net of any underlying income tax benefit from these issuance costs.

o) Equity-settled share-based payments

The Company operates equity-settled share-based remuneration plan (share options plan) for its eligible directors, officers, employees and consultants. None of the Company's plans feature any options for a cash settlement.

All goods and services received in exchange for the grant of any share-based payments are measured at their fair values, unless that fair value cannot be estimated reliably. If the Company cannot estimate reliably the fair value of the goods or service received, the Company shall measure their value indirectly by reference to the fair value of the equity instruments granted. For the transactions with employees and others providing similar services, the Company measured the fair value of the services received by reference to the fair value of the equity instruments granted.

All equity-settled share-based payments (except warrants to brokers) are ultimately recognized as an expense in the profit or loss or capitalized as an exploration and evaluation asset, depending on the nature of the payment with a corresponding credit to contributed surplus, in equity. Warrants to brokers, in respect of an equity financing are recognized as issuance cost of the equity instruments with a corresponding credit to contributed surplus, in equity.

The expense is allocated over the vesting year, based on the best available estimate of the number of share options expected to vest. Estimates are subsequently revised if there is any indication that the number of share options expected to vest differs from previous estimates. Any cumulative adjustment prior to vesting is recognized in the current period. No adjustment is made to any expense recognized in prior period if share options ultimately exercised are different to that estimated on vesting.

p) Segmental reporting

The Company presents and discloses segmental information based on information that is regularly reviewed by the president and the Board of Directors. The president and the Board of Directors have joint responsibility for allocating resources and assessing performance. The Company is of the opinion that there is only a single segment of business being the exploration and evaluation of mineral resources in Canada.

3. Standards, amendments and interpretations to existing standards that are not yet effective and have not been adopted early by the Company

At the date of authorization of these financial statements, certain new standards, amendments and interpretations to existing standards have been published but are not yet effective, and have not been adopted early by the Company. These standards will be adopted at the effective date.

Management anticipates that all of the pronouncements will be adopted in the Company's accounting policy for the first period beginning after the effective date of the pronouncement. Information on new standards, amendments and interpretations that are expected to be relevant to the Company's financial statements is provided below. Certain other new standards and interpretations have been issued but are not expected to have an impact on the Company's financial statements.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

3. Standards, amendments and interpretations to existing standards that are not yet effective and have not been adopted early by the Company (Cont'd)

IFRS 11, Joint Arrangements, ("IFRS 11")

IFRS 11 replaces IAS 31, Interests in Joint Ventures, and SIC-13, Jointly Controlled Entities – Nonmonetary Contributions by Venturers. IFRS 11 requires a single method, known as the equity method, to account for interests in jointly controlled entities which is consistent with the accounting treatment currently applied to investments in associates. IAS 28, Investments in Associates and Joint Ventures, was amended as a consequence of the issuance of IFRS 11. In addition to prescribing the accounting for investment in associates, it now sets out the requirements for the application of the equity method when accounting for joint ventures. The Company has not yet assessed the impact of the standard or determined whether it will adopt the standard early.

IFRS 12, Disclosure of Interest in Other Entities, ("IFRS 12")

IFRS 12 is a new and comprehensive standard on disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, special purpose vehicles and other offbalance sheet vehicles. The standard includes disclosure requirements for entities covered under IFRS 10 and IFRS 11.

IFRS 13, Fair Value Measurement, ("IFRS 13")

IFRS 13 provides guidance on how fair value should be applied where its use is already required or permitted by other standards within IFRS, including a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRS.

IFRS 10 to 13 were issued by the IASB on May 12, 2011 and are effective for annual periods beginning on or after January 1, 2013. The Company has not completed its assessment of the impact of these pronouncements on the results, financial position or cash flows of the Company.

4. Critical accounting estimates, judgments and assumptions

When preparing the financial statements, management undertakes a number of judgments, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results are likely to differ from the judgments, estimates and assumptions made by management, and will seldom equal the estimated results. Information about the significant judgments, estimates and assumptions that have the most significant effect on the recognition and measurement of assets, liabilities, income and expenses are discussed below.

Impairment of exploration and evaluation assets

Determining if there are any facts and circumstances indicating impairment loss or reversal of impairment losses is a subjective process involving judgment and a number of estimates and interpretations in many cases.

When an indication of impairment loss or a reversal of an impairment loss exists, the recoverable amount of the individual asset or the cash-generating units must be estimated.

The total write-off of the exploration and evaluation assets amounts to \$727,953 for the year ended August 31, 2012 (\$486,650 for the year ended August 31, 2011). No reversal of impairment losses has been recognized for the reporting periods.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

4. Critical accounting estimates, judgments and assumptions (Cont'd)

Share-based payments

The estimation of share-based payment costs requires the selection of an appropriate valuation model and consideration as to the inputs necessary for the valuation model chosen. The Company has made estimates as to the volatility of its own share, the probable life of share options and warrants granted and the time of exercise of those share options and warrants. The model used by the Company is the Black-Scholes valuation model.

Recognition of deferred income tax assets and measurement of income tax expense

Management continually evaluates the likelihood that its deferred tax assets could be realized. This requires management to assess whether it is probable that sufficient taxable income will exist in the future to utilize these losses within the carry-forward period. By its nature, this assessment requires significant judgment. To date, management has not recognized any deferred tax assets in excess of existing taxable temporary differences expected to reverse within the carry-forward period.

5. Short-term investments

As of August 31, 2012, short-term investments include guaranteed investments from Canadian financial institutions totalling \$1,279,370 (\$2,226,396 on August 31, 2011, \$5,695,330 on September 1, 2010) cashable at any time without penalties, maturing between July 9, 2013 and August 20, 2013 (between February 9, 2012 and August 17, 2012 on August 31, 2011 and between August 10, 2011 and August 17, 2011 on September 1, 2010) and bearing interest rates between 1.15% and 1.40% (between 1% and 1.1% on August 31, 2011 and between 0.90% and 0.95% on September 1, 2010).

On August 31, 2012, the balance on flow-through financing not spent according to the restrictions imposed by this financing arrangement represents \$512,793 (none as of August 31, 2011 and \$638,342 as of September 1, 2010) and is included in the short term investments. The Company has to dedicate these funds to Canadian mining properties exploration.

6. Exploration and evaluation assets (Cont'd)

Quebec

a) Launay and Launay-Trojan

The Company holds claims located in the Launay township of Quebec. Certain claims are subject to a 1% Net Smelter Return ("NSR") royalty.

On April 27, 2012, the Company signed a letter agreement where it sold to Lakeside Minerals Corp. ("Acquirer"), a subsidiary of Lakeside Minerals Inc. ("Lakeside"), 6 claims from the Launay property and the 15 claims composing the Launay-Trojan block. The Acquirer will assume the NSR royalties of those claims. The Company received 750,000 shares of Lakeside valued at \$52,500 according to the value of Lakeside shares at the closing on April 27, 2012. Of the \$52,500, \$15,000 was attributed to Launay and \$37,500 was attributed to the Launay-Trojan block. A loss on disposal of E&E assets was recorded for \$128,685 on the Launay-Trojan block.

Some claims were dropped and therefore the cost of the property was written off by \$19,000 in August 2012.

b) Ungava

The Company holds a 49% interest in the Delta-Kenty property located in the Ungava region in Quebec. Considering the market conditions that prevailed in fiscal 2009 where it was difficult to finance an exploration program for the Ungava project located in the far north, the Company didn't expect to do extensive work on the property in the near future and consequently wrote-off the mining property costs and deferred exploration expenses in 2009. The Company does minimal work on the property and continues to write them off for \$1,754 in 2012 and \$800 in 2011.

c) Mont Otish

In April 2007, the Company acquired claims located 30km northwest from the Otish basin. Following the airborne survey completed in the fall 2008 on the McLeod molybdenum property in the Otish Mountains, the Company decided to drop half of the claims and consequently wrote off half of the mining property costs and deferred exploration expenses in 2009. The Company does minimal work on the property and continues to write them off for \$205 in 2012 and \$12,651 in 2011.

d) Troilus

As per an agreement signed on October 20, 2008 and amended August 24, 2011, the Company had the option to earn a 50% interest in some Troilus properties in Quebec from Beaufield Resources Inc. ("Beaufield") by spending \$500,000 on exploration over a four year period. The President of the Company is also the President of Beaufield. The Boards of Directors of both companies had approved this transaction. Beaufield was the operator and the Company spent an amount of \$463,137 since the beginning of the agreement.

On August 23, 2012, the Company terminated the agreement with Beaufield and consequently wrote off the property for \$399,934.

e) Other properties in Québec

The Company holds claims in the Vauquelin and Tiblemont properties. The Vauquelin and Tiblemont properties and their deferred exploration expenses were written off in 2005.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

6. Exploration and evaluation assets (Cont'd)

Ontario

f) Timmins

i) Carscallen

The Company holds a 100% interest in the Carscallen property, west of Timmins. Some claims are subject to a 1.5% NSR royalty while another group of claims is subject to a 2% NSR of which the Company has the right to buy out half (1%) of the NSR for \$1,000,000.

In October and November, 2010, the Company signed three agreements to acquire 100% interests in mining claims in consideration of \$10,000 cash and two 2% NSR royalties of which 1% can be repurchased for \$500,000 each.

ii) Loveland

The Company holds a 100% interest in the Loveland property located in the Loveland Township. On October 26, 2010, the Company signed an agreement to acquire 100% interest in additional mining claims in consideration of \$1,000 cash and a 2% NSR royalty of which 1% can be repurchased for \$500,000.

On November 27, 2009, the Company signed a letter of intent with Bold Venture Inc. ("Bold") whereby Bold can acquire a 10% interest in the Loveland property by undertaking \$125,000 of exploration work. The Company was the operator. In January 2011, Bold earned its 10% interest in the Loveland property. According to the terms of the contract, Bold decided in February 2011 not to pursue the exploration and returned the 10% interest in the Loveland property to the Company in exchange of a \$40,000 payment.

No further exploration work was budgeted, therefore the property was written off in August 2012 for \$132,760.

iii) Bristol

In 2009, the Company staked the claims in the Bristol Township, West Timmins. On August 19, 2009, the Company signed a letter of intent with Northcore Resources Inc. ("Northcore") (previously Big Red Diamond Corporation) whereby Northcore can acquire a 50% interest in the Bristol property. Northcore issued 1,000,000 of its common shares to the Company (valued at \$60,000 as per the value on the stock exchange of Northcore on August 19, 2009) and will undertake \$400,000 of exploration work over a period of 48 months on the claims to earn the 50% interest. The Company is the operator. As at August 31, 2012, \$24,458 of work was completed for Northcore on the property.

iv) Big Marsh

The Company holds claims in the Carscallen Township near Timmins, subject to two 2% NSR, half (1%) of which may be repurchased for \$1,000,000 each.

v) Shaw

The property is located approximately 13km south-east of the City of Timmins and was staked in 2009. Some claims are subject to two 1% NSR royalty, half (0.5%) of which can be repurchased for \$1,000,000 each. Some claims were dropped and therefore the cost of the property was written off by \$10,900 in August 2012.

vi) Fripp

The Fripp property is located approximately 25km southwest of Timmins.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

6. Exploration and evaluation assets (Cont'd)

g) Henderson

On February 5, 2007, the Company acquired the Henderson property by staking claims in the Raglan Township in south-eastern Ontario.

On August 4, 2009, the Company signed an agreement with First Nickel Inc., ("FNI") whereby FNI has the right to earn up to 80% on the Henderson property. FNI can earn 50% by spending \$60,000 on exploration in the first year. At the 50% point, the Company will decide whether or not to participate. If the Company doesn't participate FNI can earn up to 80% by spending an additional \$100,000 in the second year. At the 80% point, the Company will participate or dilute to a 1.5% NSR Royalty. The Company can continue to explore for uranium independently from the FNI agreement.

During the summer 2010, FNI earned its 50% interest. The Company chose to participate in the exploration over \$60,000.

h) Long Lac

The Company acquired the Long Lac property through staking in Beardmore-Geraldton.

i) Eldorado

The Eldorado property is located approximately 20km southeast of Timmins.

- j) Rim Nickel McFaulds
 - i) Rim Nickel East

The Company holds 100% of the Rim Nickel East property located in the McFaulds Lake area. The property is subject to a 2% NSR royalty half (1%) of which can be repurchased by the Company for \$2,000,000.

Some claims were dropped and therefore the cost of the property was written off by \$163,400 in August 2012.

ii) Rim Nickel West

The Company held 100% of the Rim Nickel West property located in the McFaulds Lake area. Bold Ventures Inc. ("Bold") had acquired 50% of the West Rim Nickel property, following the completing of \$125,000 in exploration work, as per the agreement signed on April 9, 2008 and amended on June 2, 2008.

In March 2011, the Company has opted to relinquish its interest in the property. Bold, the partner on this property, has also opted out of the project. The Company wrote off the mining property and deferred exploration expenses for \$458,796.

iii) Riverside

Adjoining the Rim Nickel East, the Company staked in June 2008, jointly with MacDonald Mines Exploration Ltd ("MacDonald"), the Riverside property. The Company owned 50% and MacDonald the other 50%. Those claims were dropped in 2011 and restaked without the participation of MacDonald and consequently the expenses before 2011 were written off for \$14,403. Those claims will be integrated into the Rim Nickel East property.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

6. Exploration and evaluation assets (Cont'd)

iv) Broke Back and Riverbank

On January 18, 2010, the Company signed an agreement to acquire 100% interest in the Broke Back and Riverbank properties, located in McFaulds region. The Company acquired the 100% interest by reimbursing out of pocket staking costs of \$167,400 and by undertaking the assessment work needed to renew the claims. The property is subject to a 2% NSR royalty. The Company can repurchase 1% NSR for \$1,000,000 within one year of presenting a scoping study. One of the stakers of Broke Back and Riverbank is Geotest Corporation. Jens Hansen, president of the Company, is an officer of Geotest Corporation.

In December 2011, the Company closed the transaction with Green Swan Capital Corp. ("Green Swan") which consists of granting Green Swan the option to acquire up to an undivided 70% interest in the Riverbank and Broke Back properties and constitutes Green Swan's qualifying transaction.

Following the execution of a letter of intent on July 14, 2011, the parties subsequently executed a formal option agreement on August 18, 2011, as amended on December 16, 2011 (collectively, the "Option Agreement"). Under the Option Agreement, Green Swan can acquire an initial 51% undivided interest in the Riverbank and Broke Back properties by paying the Company the sum of \$25,000, issuing 2,000,000 common shares of Green Swan and 1,000,000 share purchase warrants and by incurring \$1,600,000 in work expenditures on the properties by no later than December 2014.

Following the exercise of the first option, should the Company not elect to form a joint venture on the Riverbank and Broke Back properties, Green Swan will have the option to acquire an additional 19% interest (for a total 70% undivided interest in the Riverbank and Broke Back properties) by incurring an additional \$1,000,000 in work expenditures within a delay of twenty-four months.

Following the issuance of the Exchange's final bulletin approving the qualifying transaction on January 13, 2012, Green Swan issued to the Company 2,000,000 common shares at a price of \$0.10 per share (the fair value being \$200,000) and 1,000,000 share purchase warrants as per the Option Agreement in addition to pay the \$25,000 in cash. Each warrant entitles the Company to acquire an additional common share of Green Swan at a price of \$0.15 for a twelve month period and at a price of \$0.25 per share for the following twelve month period. In accordance with Exchange policies, the securities are subject to an escrow and will be released to the Company over a period of thirty-six months.

On January 13, 2012, the 1,000,000 warrants have been valued with the Black-Scholes model with the following average assumptions: stock price at the date of grant of \$0.10, exercise price at the date of grant \$0.15, weighted risk-free interest rate of 0.86%, projected volatility of 100%, predicted average life of warrants of 2 years and no dividend yield. As of August 31, 2012, these warrants were revaluated to \$24,000 with the Black-Scholes model with the following average assumptions: weighted risk-free interest rate of 1.06%, projected volatility of 100%, predicted average life of warrants of 1.375 years and no dividend yield. The underlying expected volatility was determined by reference to historical data of comparable mining exploration companies' share on the TSX Venture Exchange over the expected average life of the warrants.

As of June 21, 2012, Green Swan sold its interest in the Broke Back and Riverbank properties to Winston Resources Inc.

7. Share capital

Authorized:

The Company's authorized share capital consists of:

- a) an unlimited number of common shares of no par value, voting and participating
- b) an unlimited number of preferred shares with an 8% non-cumulative dividend, redeemable at the request of the Company at paid up capital.

a) Private placement

On December, 7, 2011, the Company closed a non-brokered private placement for aggregate proceeds of \$569,000 consisting of the issuance of 5,690,000 units at a price of \$0.10 per unit. Each unit is comprised of one flow-through common share and one-half a common share purchase warrant. Each full warrant entitles its holder to purchase one additional common share at a price of \$0.25 for a period of 12 months following the closing. The Company paid cash commissions totaling \$10,200. On December 7, 2011, the Company's share closed at \$0.09 on the TSX Venture and the residual value of \$0.01 was entirely allocated to the benefit related to flow-through shares renunciation for a total value of \$56,900 credited to other liabilities since the warrant valuation was considered non material.

In June and July 2012, the Company closed private placements for aggregate proceeds of \$607,500 consisting of the issuance of 2,262,500 units at a price of \$0.20 per unit ("Unit A") and 620,000 units at a price of \$0.25 per unit ("Unit B").

Of the 2,262,500 Unit A, 1,550,000 were issued on June 28, 2012 and 712,500 were issued on July 9, 2012. Each Unit A is comprised of one flow-through common share and one common share purchase warrant. Each Unit A warrant entitles its holder to purchase one additional common share at a price of \$0.25 for a period of 12 months following the closing.

The 620,000 Unit B were issued on June 28, 2012. Each Unit B is comprised of one flow-through common share and one common share purchase warrant. Each Unit B warrant entitles its holder to purchase one additional common share at a price of \$0.30 for a period of 18 months following the closing. If at any time after 4 months and one (1) day after the closing date, the trading price on the TSX Venture Exchange of the common share of the Company is equal or exceeds \$0.35 for a period of 20 consecutive trading days, the Company shall be entitled to notify the holders of the warrants of its intention to force the exercise of the warrants of the Unit B. Upon receipt of such notice, the holders of the warrants shall have 30 days to exercise the warrants.

In conjunction with the private placements, insiders have subscribed for aggregate proceeds of \$120,000. The Company paid cash commissions totaling \$15,450 in relation to the private placement. In addition to commissions paid, the Company also paid other issuance cost in the amount of \$53,565 for a total share issue expenses of \$79,515 accounted into the deficit.

On June 28, 2012, the Company's share closed at \$0.145 on the TSX Venture. Of the \$0.055 residual value relating to the Unit A, \$0.029 was allocated to the benefit related to flow-through shares renunciation for a value of \$44,950 credited to other liabilities and \$0.026 was allocated to the warrants for a value of \$40,300. The \$0.026 of the warrants was valued with the Black-Scholes model with the following average assumptions: stock price at date of grant of \$0.145, exercise price at date of grant of \$0.25, weighted risk-free interest rate of 1.06%, projected volatility of 87.5%, predicted average life of warrants of 1 year and no dividend yield. The underlying expected volatility was determined by reference to historical data of the Company's shares on the TSX Venture Exchange over the expected average life of the warrants.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

7. Share capital (Cont'd)

Of the \$0.105 residual value relating to the Unit B closed on June 28, 2012, \$0.068 was allocated to the benefit related to flow-through shares renunciation for a value of \$42,160 credited to other liabilities and \$0.037 was allocated to the warrants for a value of \$22,940. The \$0.037 of the warrants was valued with the Black-Scholes model with the following average assumptions: stock price at date of grant of \$0.145, exercise price at date of grant of \$0.30, weighted risk-free interest rate of 1.18%, projected volatility of 95.4%, predicted average life of warrants of 1,5 years and no dividend yield. The underlying expected volatility was determined by reference to historical data of the Company's shares on the TSX Venture Exchange over the expected average life of the warrants.

On July 9, 2012, the Company's share closed at \$0.18 on the TSX Venture. Of the \$0.02 residual value relating to the Unit A, none was allocated to the benefit related to flow-through shares renunciation and \$0.02 was allocated to the warrants for a value of \$14,250. A \$0.043 value of the warrants was calculated with the Black-Scholes model and therefore 100% of the \$0.02 residual value was attributed to the warrant. The Black-Scholes model used the following average assumptions: stock price at date of grant of \$0.18, exercise price at date of grant of \$0.25, weighted risk-free interest rate of 1.06%, projected volatility of 87.6%, predicted average life of warrants of 1 year and no dividend yield. The underlying expected volatility was determined by reference to historical data of the Company's shares on the TSX Venture Exchange over the expected average life of the warrants.

b) Stock option plan

The Board of Directors has approved the conversion of its rolling stock option plan to a fix stock option plan (the "Plan") and received the TSX Venture approval on January 19, 2011. The reason for this change is to simplify the administration of the Plan and also to incorporate the numerous amendments brought recently to the TSX Venture Exchange's policy relating to stock options. The following are the major changes to the Plan:

- The number of shares to be delivered upon the exercise of all options granted under the plan shall not exceed 10,948,000, being slightly less than 10% of the Company's issued and outstanding shares at the time;
- Unless indicated otherwise by the Board at the time of grant, 1/6 of options granted shall vest every three months from the date of the grant;
- In the event that an optionee ceases to be an eligible person prior to the expiry date of his options, the options shall expire 12 months after the termination date or on the expiry date, whichever comes first (except for persons providing investor relations activities who will remain subject to a 30 day expiry period). In the event of termination with cause, the options of an eligible person shall expire on the date of the notice of termination; and
- Options shall no longer be subject to a 4 month hold period from the date of grant.

The purchase price of the common shares, upon exercise of each option granted under the Plan, shall be a price fixed for such option by the Board of Directors upon grant of each such option, but such price shall not be less than the market price at closing of transactions the day prior to the grant. Each option, unless sooner terminated in accordance with the terms, conditions and limitations thereof, or unless sooner exercised, shall expire on the date determined by the Board of Directors when the option is granted or, failing such determination, not later than upon the fifth anniversary of the grant of the option.

7. Share capital (Cont'd)

The total number of options granted to any one individual in any 12 month period, will not exceed 5% of the issued common shares. The total number of options granted to a consultant, in any 12 month period, will not exceed 2% of the issued common shares at the time of grant. The total number of options granted to persons providing investor relations activities, in any 12 month period, will not exceed 2% of the issued common shares at the time of grant. These options must vest in stages over a 12 month period from the date of grant with no more than 25% of the options vesting in any three month period.

A summary of changes of the Company's common share purchase options is presented below:

	20 1	2	201	1
	Number of options	Weighted average exercise price	Number of options	Weighted average exercise price
		\$		\$
Balance at beginning of year	9,700,000	0.32	9,270,000	0.29
Granted	-		2,400,000	0.27
Exercised	-		(1,470,000)	0.10
Cancelled	-		(300,000)	0.35
Expired	(1,400,000)	0.30	(200,000)	0.20
Balance at end	8,300,000	0.32	9,700,000	0.31
Exercisable at the end of year	8,300,000	0.32	8,100,000	0.32

The weighted average share price at the date of exercise was \$0.25.

Stock compensation cost fair value was calculated on options based on the following assumptions:

Fiscal 2011			
Grant date	December 23, 2010	February 16, 2011	
Optionee	Directors, officer and consultants	Consultant	
Number of options	2,200,000	200,000	
Exercise price	\$0.27	\$0.27	
Exercise price compared to the market	Higher	Higher	
Risk free interest	2.45%	2.44%	
Average expected volatility	92,14%	91.16%	
Expected dividend	-	-	
Expected life (years)	5	5	
Vesting	1/6 every 3 months	1/6 every 3 months	
Stock price	\$0.255	\$0.225	
Estimated fair value per option	\$0.18	\$0.15	
Estimated fair value	\$396,000	\$30,000	

The underlying expected volatility was determined by reference to historical data of the Company's shares on the TSX Venture Exchange over the expected average life of the options.

7. Share capital (Cont'd)

In fiscal 2011, the Company granted 2,400,000 stock options. These options were granted at an exercise price higher than the closing market value of the shares the day of the grant. The total fair value of these options amounts to \$426,000 of which \$351,540 are accounted for in stock-based compensation expenses (\$265,608 as of August 31, 2011 and \$85,932 as of August 31, 2012) and \$74,460 are capitalized in the deferred exploration expenses (\$35,492 as of August 31, 2011 and \$30,468 as of August 2012).

The following table summarizes information about common share purchase options outstanding and exercisable as at August 31, 2012:

Number of options	Exercise price	Expiry date
	\$	
100,000	0.35	October 26, 2012
1,900,000	0.50	December 17, 2012
200,000	0.25	February 25, 2013
300,000	0.10	November 7, 2013
400,000	0.40	August 7, 2014
900,000	0.36	December 30, 2014
1,900,000	0.20	July 16, 2015
200,000	0.20	July 28, 2015
2,200,000	0.27	December 23, 2015
200,000	0.27	February 16, 2016
8,300,000		

c) Warrants

Outstanding warrants entitle their holders to subscribe to an equivalent number of common shares as follow:

	2012		201	1
	Number of warrants	Weighted average exercise price	Number of warrants	Weighted average exercise price
		\$		\$
Balance at beginning	21,112,599	0.39	21,112,599	0.39
Issued	5,727,500	0.26	-	-
Expired ¹⁾	(11,491,100)	0.41	-	-
Balance at end	15,348,999	0.36	21,112,599	0.39

7. Share capital (Cont'd)

1) On June 21, 2011, the Corporation had extended the life of 4,758,928 existing warrants expiring on June 30, 2011 to June 30, 2012. The increase in the weighted average fair value on the extension date of the warrants awarded was \$0.1118 per warrant or \$532,000 estimated using the Black-Scholes model and the following average assumptions: stock price at date of grant of \$0.30, exercise price at date of grant of \$0.35, risk-free interest rate of 1.76%, projected volatility of 112%, predicted average life of warrants of 1.027 year and no dividend yield. Those warrants expired on June 30, 2012. The underlying expected volatility was determined by reference to historical data of the Company's shares on the TSX Venture Exchange over the expected average life of the warrants.

Number of warrants	Exercise price	Expiry date
	\$	
2,845,000	0.25	December 7, 2012
5,000,000	0.35	June 9, 2013
1,550,000	0.25	June 28, 2013
712,500	0.25	July 9, 2013
4,496,499	0.50	December 15, 2013 ¹⁾
125,000	0.50	December 17, 2013 ¹⁾
620,000	0.30	December 28, 2013
15,348,999		

Warrants outstanding as at August 31, 2012 are as follows:

1) On November 18, 2011, the Corporation extended the life of 4,496,499 existing warrants expiring on December 15, 2011 to December 15, 2013 as well as 125,000 existing warrants expiring on December 17, 2011 to December 2013. The increase in the weighted average fair value on the extension date of the warrants awarded was \$0.1469 per warrant or \$678,900 estimated using the Black-Scholes model and the following average assumptions: stock price at date of grant of \$0.31, exercise price at date of grant of \$0.50, risk-free interest rate of 1.32%, projected volatility of 113%, predicted average life of warrants of 2.077 years and no dividend yield. The underlying expected volatility was determined by reference to historical data of the Company's shares on the TSX Venture Exchange over the expected average life of the warrants.

d) Warrants issued as compensation

A summary of changes of the Company's warrants issued as compensation is presented below:

	201	2	201	1
	Weighted average Number exercise of warrants price		Number of warrants	Weighted average exercise price
		\$		\$
Balance of year	1,656,605	0.32	1,803,167	0.31
Expired	(1,656,605)	0.32	(146,562)	0.25
Balance of year	-		1,656,605	0.32

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

7. Share capital (Cont'd)

e) Policies and processes for managing capital

The capital of the Company consists of the items included in shareholders' equity of \$12,835,342 as of August 31, 2012 (\$13,210,912 as of August 31, 2011). The Company's objectives when managing capital are to safeguard its ability to continue its operations as well as its acquisition and exploration programs. As needed, the Company raises funds through private placements. When financing conditions are not optimal, the Company may enter into option agreements or other solutions to continue its activities or may slow its activities until conditions improve. The Company doesn't use long term debts since it doesn't generate operating revenues. There is no dividend policy. The Company doesn't have any externally imposed capital requirements neither regulatory nor contractual requirements to which it is subject, unless the Company closes a flow-through private placement where the funds are restricted in use for exploration expenses. The Company complied with the requirements in the fiscal years.

8. Income taxes

The relationship between the expected tax expense (recovery) based on the combined federal and provincial income tax rate in Canada and the reported tax expense in the statement of comprehensive income can be reconciled as follows:

	2012	2011
	\$	\$
Loss before income taxes	(1,574,932)	(1,293,401)
Expected tax recovery calculated using the combined federal and		
provincial income tax rate in Canada of 27,4% (28.9% in 2011)	(431,531)	(373,793)
Adjustments for the following items:		
Difference between deferred tax and statutory rates	7,009	18,988
Changes in temporary differences not recorded	206,658	147,607
Tax effect of issuance of flow-through shares	117,865	96,199
Reversal of the other liabilities attributable to issuance of flow-		
through shares	(92,801)	(47,307)
Stock-based compensation	26,222	81,993
Fair value variation non deductible	21,663	8,771
Realization of a deferred tax liability not previously recorded on		
mining property	54,204	19,742
Non deductible items and others	(2,090)	493
Deferred income tax expense (recovery)	(92,801)	(47,307)

The 2012 effective tax rate is lower than the 2011 effective tax rate following a decrease in the federal statutory tax rate as of January 1, 2012.

The major components of deferred tax expense (recovery) are outlined below:

	2012	2011
	\$	\$
Origination and reversal of temporary differences	(331,532)	(262,794)
Tax effect of issuance of flow-through shares	117,865	96,199
Reversal of the other liabilities attributable to issuance of flow-		
through shares	(92,801)	(47,307)
Difference between deferred tax and statutory rates	7,009	18,988
Changes in temporary differences not recorded	206,658	147,607
Total deferred tax expense (recovery)	(92,801)	(47,307)

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

8. Income taxes (Cont'd)

Available temporary differences for which no deferred tax asset were recorded:

	August 3	1, 2012	August 3	1, 2011
	Federal	Federal Quebec		Quebec
	\$	\$	\$	\$
E&E assets	2,631,471	7,710,902	2,634,263	7,205,782
Property and equipment	20,530	20,530	20,530	20,530
Listed shares	1,319,375	1,319,375	1,154,624	1,154,624
Share issue expenses	267,179	267,179	336,556	336,556
Non-capital losses	3,966,000	3,883,000	3,356,000	3,274,000
Capital losses	92,739	92,739	92,739	92,739
	8,297,294	13,293,725	7,594,712	12,084,231

The Company has non-capital losses which are available to reduce income taxes in future periods, for which no deferred tax asset has been recorded in the statement of financial position, that can be carried over the following years:

	Federal	Quebec
	\$	\$
2014	387,000	368,000
2015	226,000	215,000
2026	222,000	190,000
2027	263,000	245,000
2028	292,000	292,000
2029	470,000	469,000
2030	820,000	819,000
2031	676,000	676,000
2032	610,000	609,000
	3,966,000	3,883,000

As at August 31, 2012, accumulated capital losses of \$92,739 (\$92,739 in 2011) are available to be applied against future capital gains. These losses may be carried forward indefinitely.

The Company has unrecorded investment tax credits of \$636,052 (\$616,986 in 2011) which are available up to 2027 to reduce the federal income taxes.

The Company has unrecorded resources tax credits of \$50,763 (\$50,763 in 2011) which are available up to 2017 to reduce the Quebec income taxes.

9. Loss per share

In calculating the diluted loss per share, dilutive potential common shares such as share options and warrants have not been included as they would have the effect of decreasing the loss per share. Decreasing the loss per share would be antidilutive. Details of share options and warrants issued that could potentially dilute earnings per share in the future are given in Note 7.

Both the basic and diluted loss per share have been calculated using the net loss as the numerator, i.e. no adjustment to the net loss was necessary in 2012 and 2011.

	2012	2011
	\$	\$
Net loss for the year	(1,482,131)	(1,246,094)
Weighted average number of shares in circulation	115,599,447	110,704,342
Basic and diluted loss per share	(0.01)	(0.01)

There have been no other transactions involving common shares between the reporting date and the date of authorization of these financial statements.

10. Statement of cash flows

	2012	2011
	\$	\$
Exercise of options credited to share capital	-	48 300
Tax credits receivable applied against E&E expenses	20,897	31 276
Additions of mining properties included in accounts payable and accrued		
liabilities	-	4,381
Additions of E&E expenses included in accounts payable and accrued		
liabilities	96,359	893,568
Due from partners included in E&E assets	-	25 223
Due to partners included in E&E assets	-	4,296
Listed shares received on disposal of E&E assets	282,500	-
Stock-based compensation included in E&E expenses	57,886	73,996

11. Compensation to key management and related party disclosures

a) Compensation to key management

The Company's key management personnel are members of the board of directors (of which the president of the Company is a member) as well as the chief financial officer. Key management compensation is as follows:

	Years ended August 31,		
	2012	2011	
	\$	\$	
Short-term benefits			
Salaries including benefits	12,988	54,485	
Professional and consulting fees	139,110	112,707	
Salaries capitalized in E&E expenses	-	47,574	
Professional fees capitalized in E&E expenses	61,900	58,270	
Total short-term benefits	213,998	273,036	
Stock-based compensation	94,213	265,792	
Total compensation	308,211	538,828	

11. Compensation to key management and related party disclosures (Cont'd)

During the year ended August 31, 2011, 1,200,000 and 270,000 shares options where exercised at a price of \$0.10 and \$0.125 respectively by a director and officers.

During the year ended August 31, 2012, an officer participated for \$40,000 in the private placement closed on December 7, 2011 and an officer and directors participate for \$80,000 in the private placement closed on June 28, 2012 (see Note 7a).

b) Transactions with other related party

In the normal course of operations in 2012 and 2011, in addition to the amounts listed above in the compensation to key management (Note 11a):

- a) A company controlled by an officer charged rent totaling \$33,000 (\$36,000 in 2011) expensed in office expenses;
- b) A company controlled by an officer charged professional fees of \$25,843 (\$21,516 in 2011);

As at August 31, 2012, the balance due to the related parties amounted to \$25,275 (August 31, 2011 – \$22,051) and was recorded in accounts payable and accrued liabilities.

12. Financial Instruments

a) Categories of financial assets and liabilities

The carrying amounts and fair values of financial instruments presented in the statement of financial position are as follows:

	August 31, 2012		August 31, 2011		September 1, 2010	
	Carrying amount	Fair value ¢	Carrying amount	Fair value	Carrying amount	Fair value
Financial assets At amortized cost	\$	\$	\$	\$	\$	\$
Cash	23,495	23,495	50,092	50,092	117,421	117,421
Short-term investments	1,279,370	1,279,370		2,226,396	5,695,330	
Due from partners Other receivables	-	-	29,794	29,794 -	8,337 17,129	8,337 17,129
At fair value through profi or loss	it					
Listed share	271,125	271,125	146,750	146,750	218,625	218,625
Financial liabilities <i>At amortized cost</i> Accounts payable and						
accrued liabilities Due to partners	160,520 -	160,520 -	1,057,635 4,894	1,057,635 4,894	738,643 20,000	738,643 20,000

The carrying value of cash, short-term investments, due from partners, other receivables, accounts payable and accrued liabilities and due to partners are considered to be a reasonable approximation of fair value because of the short-term maturity of these instruments.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

12. Financial Instruments (Cont'd)

b) Financial instruments measured at fair value

The following presents financial assets and liabilities measured at fair value in the statement of financial position in accordance with the fair value hierarchy. This hierarchy groups financial assets and liabilities into three levels based on the significance of inputs used in measuring the fair value of the financial assets and liabilities. The fair value hierarchy has the following levels:

- a) Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities at the reporting date;
- b) Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- c) Level 3: inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The level within which the financial asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement. Listed shares in quoted mining exploration companies measured at fair value as at August 31, 2012 and 2011 and September 1, 2010 are classified in Level 1.

c) Financial instrument risk

The Company is exposed to various risks in relation to financial instruments. The main types of risks the Company is exposed to are market risk, credit risk and liquidity risk.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The Company is exposed to the following types of market risk: interest rate risk and other price risk. The Company focuses on actively securing short- to medium-term cash flows by minimizing the exposure to financial markets. The Company does not actively engage in the trading of financial instruments for speculative purposes.

The most significant financial risks to which the Company is exposed are described below.

Market risk

Interest rate risk sensitivity

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in interest rates. As at August 31, 2012, the short-term investments were at fixed interest rates. Interest rate movements may affect the fair value of the fixed interest financial assets. Because these financial assets are recognized at amortized cost the fair value variation has no impact on profit or loss.

Other price risk sensitivity

The Company is exposed to fluctuations in the market prices of its listed shares in quoted mining exploration companies. The fair value of the listed shares represents the maximum exposure to price risk. If the quoted stock price for these securities had changed by $\pm 20\%$ as at August 31, 2012, August 31, 2011 and September 1, 2010, net loss and equity would have changed by \$54,225, \$29,350 and \$43,725 respectively.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

12. Financial Instruments (Cont'd)

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. As at August 31, 2012, August 31, 2011 and September 1, 2010, the Company's maximum exposure to credit risk is limited to the carrying amount of financial assets at the reporting date, as summarized below:

	August 31, 2012		August	August 31, 2011		September 1, 2010	
	Carrying amount	Fair value	Carrying amount	Fair value	Carrying amount	Fair value	
	\$	\$	\$	\$	\$	\$	
Cash	23,495	23,495	50,092	50,092	117,421	117,421	
Short-term investments	1,279,370	1,279,370	2,226,396	2,226,396	5,695,330	5,695,330	
Due from partners	-	-	29,794	29,794	8,337	8,337	
Other receivables	-	-	-	-	17,129	17,129	
Carrying amounts	1,302,865	1,302,865	2,306,282	2,306,282	5,838,217	5,838,217	

The other receivables are mainly receivables from other exploration companies sharing exploration camp facilities. The exposure to credit risk for the Company's receivables has to be monitored continuously. In 2012, the Company recorded impairment on a due from partners for \$28,375 due to liquidity challenges one of its partners.

As at August 31, 2012, the Company's management considers that all the above financial assets that are not impaired or past due for each of the reporting dates under review are of good credit quality.

The credit risk for cash and cash equivalents, and guaranteed investment certificates is considered negligible, since the counterparties are reputable banks with high quality external credit ratings.

Liquidity Risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk management serves to maintain a sufficient amount of cash and to ensure that the Company has financing sources such as private and public investments for a sufficient amount. Over the past period, the Company has financed its exploration and evaluation programs, its working capital requirements and acquisitions of mining properties through private and flow-through financings.

The following table presents contractual maturities (including interest payments where applicable) of the Company's liabilities:

	August 31,	August 31,	September 1,
	2012	2011	2010
	Carrying	Carrying	Carrying
	amount	amount	amount
	\$	\$	\$
Within three months: Accounts payable and accrued liabilities Due to partners Total	160,520 - 160,520	1,057,635 4,894 1,062,529	738,643 20,000 758,643

The Company's existing cash and short-term investments significantly exceed the current cash outflow requirements.

13. Leases

The Company leases its offices under a lease of one year, renewable automatically for one year, unless one of the parties gives a 3 month cancellation notice. The lease has been renewed automatically till August 2013 and the minimum operating lease payments within one year are \$24,000.

The minimum lease payments recognized as an expense during the year ended August 31, 2012 amount to \$33,000 (\$36,000 for the year ended August 31, 2011).

14. First-time adoption of IFRS

These are the Company's first year end financial statements prepared in accordance with IFRS. The date of transition for the Company to IFRS is September 1, 2010.

The Company's IFRS accounting policies presented in Note 2 have been applied in preparing the financial statements for the reporting period ended August 31, 2012, the comparative information and the opening statement of financial statement at the date of transition. The Company has applied *IFRS 1, first time adoption of International Financial Reporting Standards* in preparing these first IFRS year end financial statements.

The effect of the Company's transition from Canadian GAAP to IFRS, as described in Note 2, is summarized in this note as follows:

- a) Transition elections;
- b) Reconciliation of balance sheet, equity, loss and comprehensive loss as previously reported under Previous GAAP to IFRS and explanatory notes.

a) Transition elections

IFRS 1, First Time Adoption of IFRS, offers the possibility to utilize certain exemptions from full retrospective application of IFRS. The Company evaluated the options available and elected to adopt the following transition exemptions:

Mandatory exceptions:

- 1. The estimates established by the Company in accordance with IFRS at the date of transition to IFRS are consistent with estimates made for the same date in accordance with Previous GAAP, after adjustments to reflect any difference in accounting principles, if applicable.
- Financial assets and liabilities that were derecognized before September 1, 2010 pursuant to Previous GAAP were not recognized under IFRS. The Company has early applied the change in IFRS 1 in this respect regarding the application date of the exception, i.e. September 1, 2010.

Optional exemptions:

- 3. The Company has chosen not to apply IFRS 2, *Share-based payment*, retrospectively to options granted on or before November 7, 2002 or granted after November 7, 2002 and not vested before the date of transition to IFRS.
- 4. The Company has elected not to apply IFRS 3, *Business Combinations*, retrospectively to business combinations that occurred before the date of transition. See Note 14b) for an explanation of the effect of the exemption.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

14. First-time adoption of IFRS (Cont'd)

b) Reconciliation of the Statement of financial position, equity, loss and comprehensive loss and explanatory notes

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

14. First-time adoption of IFRS (Cont'd)

1. Share issued by flow-through placements

Under Canadian GAAP, the entire proceeds received on the issuance of flow-through shares were credited to share capital. When the renouncement of the tax deductions related to the resource expenditure for income tax purposes, temporary taxable differences were created and a deferred income tax was recorded, and the related charge was treated as share issue costs.

Under IFRS, issuance of flow-through shares is accounted for similarly to the issuance of a compound financial instrument. The liability component represents the obligation to revert the tax benefit to the investors. Proceeds from the issuance of shares by flow-through private placements are allocated between shares issued, warrants and a liability using the residual method.

Proceeds are first allocated to shares according to the quoted price of existing shares at the time of issuance and any residual in the proceeds is allocated to the liability. The accumulation of all these residual proceeds as at September 1, 2010 amount to \$535,694, reducing the share capital and creating the other liability benefit related to flow-through shares renunciation.

This other liability was reversed to deferred income taxes in the statement of comprehensive income when the work is performed. As at September 1, 2010, \$488,387 of the other liability was reversed and the remaining \$47,307 was revised in the three month period ended November 30, 2010.

Under IFRS, when the Company has renounced or has the intention to renounce its deductions and has incurred its admissible expenditures, the sale of tax deductions is recognized in profit or loss as a reduction of deferred tax expenses and a deferred tax liability is recognized for the taxable temporary difference that arises from the difference between the carrying amount of admissible expenditures capitalized as an asset and its tax basis.

Since the share issue expenses are part of the deficit for the Company, the temporary taxable differences were already recorded in the opening deficit, therefore there is no adjustment needed.

As there is no exemption under IFRS 1 for first-time adopters regarding flow-through shares, the treatment under IFRS needs to be applied retrospectively.

2. Cash held for exploration expenses

Under Canadian GAAP, the cash held for exploration expenses was presented as a long term asset. Under IFRS, the cash held for exploration expenses is presented in short term assets if used within one year.

3. Business combination

The Company has elected not to restate business combinations that occurred before the date of transition to IFRS. No difference has been recorded for the acquisitions, i.e. there is no adjustment to the acquired identifiable assets and liabilities.

4. IFRS reclassifications

Some reclassifications were done to comply with the IFRS presentation.

Notes to Financial Statements As at August 31, 2012 and 2011 and September 1, 2010 (In Canadian dollars)

15. Contingencies and commitments

The Company is partially financed through the issuance of flow-through shares and, according to tax rules regarding this type of financing, the Company is engaged in realizing mining exploration work.

These tax rules also set deadlines for carrying out the exploration work, which must be performed no later than the earlier of the following dates:

- Two years following the flow-through placements;

- One year after the Company has renounced the tax deductions relating to the exploration work.

Commitments to carry out exploration work that are not respected are subject to a combined tax rate of 27% (Canada and Quebec).

However, there is no guarantee that the Company's exploration expenses will qualify as Canadian exploration expenses, even if the Company is committed to taking all the necessary measures in this regard. Refusal of certain expenses by the tax authorities would have a negative tax impact for investors.

During the year, the Company received \$1,176,500 following flow-through placements for which the Company has the intention to renounce to tax deductions of \$607,212 after December 31, 2012 and has renounced to tax deductions of \$568,431 as at February 29, 2012. Management is required to fulfil its commitments within the stipulated deadline of December 31, 2012 for \$60,518 and of December 31, 2013 for \$452,275.

16. Subsequent event

On November 16, 2012, the Company announced the extension for one year the term of the 2,845,000 warrants expiring December 7, 2012.
