Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

Management has prepared the following discussion and analysis (MD&A) which constitutes management's review of financial and operating factors affecting Melkior Resources Inc. ("Melkior" or the "Company") for the year ended August 31, 2014. This MD&A should be read in conjunction with the Company's financial statements and related notes as at August 31, 2014. All figures are in Canadian dollars unless otherwise noted.

Further information regarding the Company and its operations are filed electronically on the System for Electronic Document Analysis and Retrieval (SEDAR) in Canada and can be obtained from www.sedar.com.

Nature of activities

Melkior is a junior exploration company with exploration projects in West Timmins and holds several other exploration properties of which the most important is the 90% owned Launay gold property in West Quebec.

Overall performance

1) Working capital position at August 31, 2014

Melkior has working capital of \$456,319 as at August 31, 2014 (\$633,219 as of August 31, 2013) which will allow the Company to undertake its exploration program for at least the 12 months. During fiscal 2014, the Company raised \$170,000 non-flow through and \$40,000 flow in private placements (\$NIL in Fiscal 2013).

2) Financings during the year ended August 31, 2014 and up to November 28, 2014

On October 16, 2013, the Company closed a non-brokered private placement for aggregate proceeds of \$170,000 consisting of the issuance of 3,400,000 units at a price of \$0.05 per unit. The Company paid cash commissions totaling \$4,550 and issued 120,000 broker's warrants,

On December 23, 2013, the Company closed a private placement for aggregate proceeds of \$40,000 consisting of the issuance of 666,667 units at a price of \$0.06 per unit.

On October 20, 2014, the Company sold a total of 781 units, at a price of \$500 per unit, for total gross proceeds of \$390,500. Each unit consisted of 8,500 flow through and 1,500 non-flow through common shares and 10,000 common share purchase warrants, each warrant entitling the holder thereof to acquire one additional common share of the Company at a price of \$0.05 per share for a period of 24 months. In connection with this private placement, the Company paid a finders' fee of \$27,788 cash commissions and 555,750 warrants. The broker's warrants had the same terms as the placement warrants.

3) Change in directors

On December 18, 2013, the Company announced the appointment of Bruce Deluce as Director of Melkior.

On February 21, 2014, Mr. Lee Barker decided that he would not run for re-appointment as a Director of Melkior.

4) Exploration and evaluation expenditure summary for the year ended August 31, 2014

Exploration expenditures for the year ended August 31, 2014 totaled \$219,289 (2013 - \$509,609). The main exploration expenditures were incurred on the Carscallen (Timmins) property. Melkior's joint venture partner Beaufield Resources Inc. ("Beaufield") incurred exploration expenses of \$360,454 on the Launay property.

5) Memorandum of understanding with the Mattagami First Nation

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

On October 4, 2013, the Company announced it had signed a memorandum of understanding ("MOU") with the Mattagami First Nations of Gogama, Ontario, on the Carscallen-Big Marsh- Bristol Projects in the Timmins area.

Under the terms of the MOU, Melkior issued 200,000 common shares on December 23, 2013, and will pay 2% of all assessment eligible exploration costs to the Mattagami First Nation.

Under the new Ontario Mining Act, mineral exploration companies are required to undertake consultation with the First Nations that have traditional rights and treaty rights on the lands being explored. Melkior signed the MOU referred to in the news release dated October 4, 2013 indicating a recognition and respect for these rights as part of the consultation process. The 200,000 share payment was agreed to in recognition of the importance of the assistance provided in this process.

6) Joint venture on Launay project

On November 7, 2013, the Company announced that it had entered into an option and joint-venture agreement with Beaufield on its wholly owned Launay gold project (the "Project") located in Launay township, in the province of Quebec.

Under the terms of the agreement Beaufield will have the option to earn an interest of up to 50% in the Project by incurring exploration expenditures aggregating \$1,250,000 over five years, with a minimum \$250,000 of exploration expenditures in the first year. Beaufield will earn 10% interest for each \$250,000 of exploration expenses.

Selected financial information

	Year ended August 31,	
	2014	2013
	\$	\$
Operating loss	(3,728,362)	(1,385,408)
Loss before income taxes	(3,661,244)	(1,551,279)
Net loss and comprehensive loss for the year	(3,641,544)	(1,500,070)
Basic and diluted net loss per share	(0.03)	(0.01)

	August 31, 2014	August 31, 2013
	\$	\$
Current assets	485,660	650,182
Exploration assets	7,559,759	10,806,653
Total assets	8,045,419	11,456,835
Current liabilities	29,341	16,963
Total shareholders' equity	8,016,078	11,439,872

Results of operations

Total expenses increased by \$2,342,954 in 2014 (\$3,728,362) compared to 2013 (\$1,385,408). The significant variances from last year are as following:

- During the year ended August 31, 2014, the decrease in office expenses of \$12,073 is due to a cost reduction strategy implemented by management.

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

- Professional and consulting fees are as follow:

	2014	2013
	\$	\$
Legal	-	7,315
Accounting and audit	54,886	139,932
Consulting	4,250	600
Management	26,640	25,150
Professional and consulting fees	85,776	172,997

There were no legal fees incurred in the current year as the Company prepared all required filings with the TSX Venture and other regulatory agencies in house.

Accounting and audit fees is lower in 2014 compared to 2013 based on a decrease in fees charged by the current CFO compared to the prior CFO. During the current year total CFO fees were \$28,886 compared to \$60,692 in the prior year which, included severance payment made to the prior CFO of \$20,000 in 2013. Also fees charged by Raymond Chabot Grant Thornton in the current year were \$26,000 compared to \$39,080 in the prior year.

- During the prior year the Company received payment on a receivable for which an allowance was taken in Fiscal 2012. No such allowances were taken in the prior year.
- During the year ended August 31, 2014, investor and shareholder relations costs have decreased by \$16,350 compared to 2013. This is part of a management effort to further reduce and control costs in fiscal 2014. The Company has decreased the number of conferences and trade shows which it attended in 2014 compared to 2013.
- During the year ended August 31, 2014, stock based compensation decreased by \$80,100 compared to 2013. In 2014 the Company issued 600,000 stock options compared to 3,400,000 with the following assumptions:

Grant date	2014	2013
Number of options	600,000	3,400,000
Exercise price	\$0.10	\$0.10
Risk free interest	1.13%	1.16%
Expected volatility	164.62%	97.68%
Expected dividend	-	-
Expected life (years)	5	5
Vesting	100% at date of grant	100% at date of grant
Stock price at the date of grant	\$0.03	\$0.05
Estimated fair value per option	\$0.03	\$0.03
Estimated fair value	\$16,000	\$94,000

- During the year ended August 31, 2013, the Company realized a loss on the sale of its McFaulds - River Bank property of \$104,399. No properties were sold in 2014.
- During the year ended August 31, 2014, the Company incurred \$28,656 favorable change in value of listed shares (\$176,510 unfavorable in 2013). The Company did not dispose of or acquire any listed shares in 2014.
- The decrease in write-off of exploration and evaluation assets in 2014 compared to 2013 of \$251,380 was due to management's revaluation of the Company's exploration assets in the current and prior year and decision to discontinue active exploration of second tier properties. During the current year end the Company realized a write-off on its exploration properties of \$611,670 due to the write-off of

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

Fripp, Henderson, Bristol, Kenty Lake, and Long Lac properties were being discontinued. During the year ended August 31, 2013, the Company realized a write-off on its exploration properties of \$863,050 due to the write-off of the Shaw, Eldorado, Ungava, and Broke Back properties in 2013.

- During the year ended August 31, 2014, the Company took a 100% impairment on the Rim Nickel (McFaulds) property of \$2,868,535 until management could further assess and identify which claims would be dropped. No such impairment was deemed necessary in 2013.

Summary of quarterly results for the eight most recent quarters

	August 31, 2014	May 31, 2014	February 28, 2014	November 30, 2013

Financing activities

On October 16, 2013, the Company closed a non-brokered private placement for aggregate proceeds of \$170,000 consisting of the issuance of 3,400,000 units at a price of \$0.05 per unit. Each unit is comprised of one common share and one common share purchase warrant. Each warrant entitles its holder to purchase one additional common share at a price of \$0.05 until October 16, 2015. The Company paid cash commissions totaling \$4,550 and issued 120,000 broker warrants. The broker warrants had the same terms as the placement warrants.

On December 23, 2013, the Company closed private placements for aggregate proceeds of \$40,000 consisting of the issuance of 666,667 units at a price of \$0.06 per unit. Each unit is comprised of one flow-through common share and one common share purchase warrant. Each warrant entitles its holder to purchase one additional common share at a price of \$0.06 until December 23, 2015. There were no commission paid in relation to the private placement.

On October 20, 2014, the Company sold a total of 781 units, at a price of \$500 per unit, for total gross proceeds of \$390,500. Each unit consisted of 8,500 flow through and 1,500 non-flow through common shares and 10,000 common share purchase warrants, each warrant entitling the holder thereof to acquire one additional common share of the Company at a price of \$0.05 per share for a period of 24 months. All warrants issued in the private placement carry an accelerator clause to which takes effect after 12 months if the Company's stock trades above \$0.10 ("the triggering event"). The accelerator clause requires the warrant to be exercised within 30 days of the triggering event prior to the warrant expiring.

In connection with this private placement, the Company paid a finders' fee of \$27,788 cash commissions and 555,750 warrants. The broker's warrants had the same terms as the placement warrants.

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

Working capital

Melkior has working capital of \$456,319 as at August 31, 2014 (\$633,219 as of August 31, 2013) which will allow the Company to undertake its exploration program for at least the 12 months. During fiscal 2014, the Company raised \$170,000 non-flow through and \$40,000 flow in private placements (\$NIL in Fiscal 2013).

Management is of the opinion that, subject to continuing to be able to raise equity financing in the future, it will be able to maintain the status of its current exploration obligations and to keep its properties in good standing. Advanced exploration of some of the mineral properties would require substantially more financial resources. In the past, the Company has been able to rely on its ability to raise financing in public or privately negotiated equity offerings. There is no assurance that such financing will be available when required, or under terms that are favorable to the Company. The Company may also elect to advance the exploration and development of mineral properties through joint-venture participation. When financing conditions are not optimal, the Company may enter into option agreements or other solutions to continue its activities or may slow its activities until conditions improve.

Going Concern

The annual financial statements of the Company have been prepared on the basis that the Company will continue as a going concern, which presumes that it will be able to realize its assets and discharge its liabilities in the normal course of business. Due to continuing operating losses and current working capital levels, the application of the going concern basis is dependent upon the Company achieving profitable operations to generate sufficient cash flows to fund continuing operations or in the absence of adequate cash flows from operations, obtaining additional financing to support operations for the foreseeable future. It is not possible to predict whether financing efforts will be successful or if the Company will attain profitable levels of operations. These factors may cast significant doubt on the entity's ability to continue as a going concern. The annual financial statements do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern. If management is unsuccessful in securing capital, the Company's assets may not be realized or its liabilities discharged at their carrying amounts and these differences could be material. Changes in future conditions could require material write-downs of the carrying amounts of mineral resource interests.

Given that the Company has not yet determined whether its mineral properties contain mineral deposits that are economically recoverable, the Company has not yet generated income or cash flows from its operations, cast a doubt regarding the Company's ability to continue as a going concern. As at August 31, 2014, the Company has a deficit of \$38,687,843 (\$35,039,749 as at August 31, 2013). These conditions indicate the existence of a material uncertainty that may cast significant doubt regarding the Company's ability to continue as a going concern.

The Company's ability to continue as a going concern is dependent upon its ability to raise additional financing to further explore its mineral properties and continued support of suppliers and creditors. Even if the Company has been successful in the past in doing so, there is no assurance that it will manage to obtain additional financing in the future.

Critical accounting estimates, judgments and assumptions

When preparing the financial statements, management undertakes a number of judgments, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results are likely to differ from the judgments, estimates and assumptions made by management, and will seldom equal the estimated results. Information about the significant judgments, estimates and assumptions that have the most significant effect on the recognition and measurement of assets, liabilities, income and expenses are discussed below.

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

Impairment of exploration and evaluation assets

Determining if there are any facts and circumstances indicating impairment loss or reversal of impairment losses is a subjective process involving judgment and a number of estimates and interpretations in many cases.

When an indication of impairment loss or a reversal of an impairment loss exists, the recoverable amount of the individual asset or the cash-generating units must be estimated.

Total write-offs and impairments of \$3,480,205 have been recognized on the Fripp, Bristol, Henderson, Kenty Lake, Long Lac and Rim Nickel properties. No reversal of impairment has been recognized during the year ended August 31, 2014.

No testing for impairment was conducted on the Big Marsh, Vaillant (Raglan), Tiblemont, Carscallen and Launay properties despite the fact that the carrying value of the Company's net assets is superior to its market capitalization and despite the fact that no significant fieldwork was undertaken on these properties during the year. Management judged that there was no testing for impairment required this year on these properties, because despite unfavorable change of the overall climate of the sector as well as the general situation of the economy that have had an impact on the Company's capacity to raise additional capital in order to pursue its exploration activities, coupled with a decrease in share price, the Company has sufficient funds to respect its short term obligations and has both the intention and capacity to keep these properties until the economic context improves and the Company can thus pursue exploration activities on these properties after raising additional capital.

Share-based payments

The estimation of share-based payment costs requires the selection of an appropriate valuation model and consideration as to the inputs necessary for the valuation model chosen. The Company has made estimates as to the volatility of its own share, the probable life of share options and warrants granted and the time of exercise of those share options and warrants. The model used by the Company is the Black-Scholes valuation model.

Recognition of deferred income tax assets and measurement of income tax expense

Management continually evaluates the likelihood that its deferred tax assets could be realized. This requires management to assess whether it is probable that sufficient taxable income will exist in the future to utilize these losses within the carry-forward period. By its nature, this assessment requires significant judgment. To date, management has not recognized any deferred tax assets in excess of existing taxable temporary differences expected to reverse within the carry-forward period.

Tax credits receivable

The calculation of the Company's refundable tax credit on qualifying exploration expenditures incurred and refundable credits involves a degree of estimation and judgment in respect of certain items whose tax treatment cannot be finally determined until a notice of assessment has been issued by the relevant taxation authority and payment has been received. Difference arising between the actual results following final resolution of some of these items and the assumptions made could necessitate adjustments to the refundable tax credit, exploration and evaluation assets, and income tax expense in future periods.

Outstanding share data

	November 28, 2014	August 31, 2014	August 31, 2013

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

Stock option plan

The purpose of the Plan is to serve as an incentive for the directors, officers and service providers who will be motivated by the Company's success as well as to promote ownership of common shares of the Company by these people. There is no objective attached to the plan and no relationship to manage the Company's risks.

The Board of Directors has approved the conversion of its rolling stock option plan to a fixed stock option plan (the "Plan") and received the TSX Venture approval on January 19, 2011. The reason for this change is to simplify the administration of the Plan and also to incorporate the numerous amendments brought recently to the TSX Venture Exchange's policy relating to stock options. The following are the major changes to the Plan:

- The number of shares to be delivered upon the exercise of all options granted under the plan shall not exceed 10,948,000, being slightly less than 10% of the Company's issued and outstanding shares at the time;
- Unless indicated otherwise by the Board at the time of grant, 1/6 of options granted shall vest every three months from the date of the grant;
- In the event that an optionee ceases to be an eligible person prior to the expiry date of his options, the options shall expire 12 months after the termination date or on the expiry date, whichever comes first (except for persons providing investor relations activities who will remain subject to a 30-day expiry period). In the event of termination with cause, the options of an eligible person shall expire on the date of the notice of termination; and
- Options shall no longer be subject to a 4-month hold period from the date of grant.

The purchase price of the common shares, upon exercise of each option granted under the Plan, shall be a price fixed for such option by the Board of Directors upon grant of each such option, but such price shall not be less than the market price at closing of transactions the day prior to the grant. Each option, unless sooner terminated in accordance with the terms, conditions and limitations thereof, or unless sooner exercised, shall expire on the date determined by the Board of Directors when the option is granted or, failing such determination, not later than upon the fifth anniversary of the grant of the option.

The total number of options granted to any one individual in any 12 month-period, will not exceed 5% of the issued common shares. The total number of options granted to a consultant, in any 12-month period, will not exceed 2% of the issued common shares at the time of grant.

The total number of options granted to persons providing investor relations activities, in any 12-month period, will not exceed 2% of the issued common shares at the time of grant. These options must vest in stages over a 12-month period from the date of grant with no more than 25% of the options vesting in any three-month period.

Stock forfeitures and cancellations

On January 31, 2014, 700,000 stock options with a weighted average exercise price of \$0.28 were forfeited unexercised and were cancelled by the Company. The options would have expired December 2014, July 2015 and December 2015.

Qualified Person

Technical information contained in this MD&A has been prepared by or under the supervision of Jens E. Hansen, P. Eng. and President and Director of Melkior, who is a "Qualified Person" for the purpose of National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101"). He has verified the data comprising such technical information, including sampling, analytical and test data underlying the information or opinions contained herein.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

**Carscallen Gold,
Timmins, Ontario**
(100% owned)

Property Description

The Carscallen property covers 16.64 square-kilometres for a total of 104 claim units and is located 25 kilometres due west of the City of Timmins, Ontario. Access to the property is excellent, via a series of roads and trails which connect to Highway 101.

The Company holds a 100% interest in the property. Some claims are subject to a 1.5% net smelter return ("NSR") royalty while another group of claims are subject to a 2% NSR of which the company has the right to buyout half (1%) of the NSR for \$1,000,000.

Metallurgical								95% gold recovery with 8.92 g/t Gold head grade (ZamZam)	-

Exploration on Carscallen from May 31st to August 31st, 2014

No field work was carried out on the property during the three months ending in August 31st, 2014. The Company is currently integrating all the data to present a plan for the top part of the ZamZam system, which will provide the lateral and vertical outline of the upper portion of the zone.

On April 9th, 2014, Melkior released channel sample results taken in November 2013. The program was undertaken concurrently with drilling to evaluate the near surface portion of the ZamZam zone to permit a preliminary near surface resource calculation.

ZamZam is the northern portion of the ZamZam-Shenkman-Mystery system of gold bearing veins that have been detected over a distance of approximately 1,000 metres and drilled at 50 to 100 metre spacing to a depth of 400 metres. Approximately 90% of the holes drilled have encountered gold values of greater than 1 g/t and widths of up to 13 metres. Gold occurrences are widespread on the Carscallen property with a total of seven zones discovered to date.

The results from the detailed ZamZam drill program have been announced in earlier news releases (please refer to news releases dated November 28th, 2013 and February 28th, 2014) and have defined a portion of ZamZam measuring 260 metres in length and to a depth of 80 to 115 metres. The holes were spaced at 25 to 30 metres.

The presently announced channel sampling was undertaken to extend the drilled zone to surface. A close spacing of 2 metres between samples was undertaken to understand, in detail, the variation in the grade and width along a portion of the vein or vein systems.

Some of the values encountered in drilling beneath the veins were reported in the following holes: 40.40 g/t over 0.65 metres (CAR-86-2013), 34.06 g/t over 1.50 metres (CAR-87-2013) and 80.50 g/t over 0.55 metres (CAR-88-2013) (please refer to press release dated November 28th, 2013).

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

The north-south trending ZamZam zone was sampled by 14 parallel east-west channels spaced at approximately 2 metre intervals over a strike length of 24.70 metres. Table 1 displays the results.

Table #1 – Channel sample results

Channel #	Interval (Metres)*	Gold (g/t)
CH-01-2012	1.00	16.25
CH-02-2012	3.00	2.36
CH-03-2012	1.00	11.10
CH-04-2012	2.00	3.28
CH-20-2013	0.50	55.80
CH-21-2013	0.50	34.50
CH-22-2013	0.60	62.30
CH-23-2013	0.45	79.30
CH-24-2013	0.50	25.60
CH-25-2013	0.50	12.35
CH-26-2013	0.40	20.20
CH-27-2013	0.30	68.40
CH-28-2013	0.60	5.61
CH-29-2013	0.60	7.15

* The intervals are believed to represent true widths.

An exploration program based on final interpretations of the drilling data is planned for 2014-2015 (\$125,000).

Big Marsh

(100% owned – gold, base metals)

Property description

The Big Marsh property covers 14.56 square kilometres for a total of 91 claim units in Carscallen Township. It is located 25 kilometres due west-northwest of the City of Timmins, Ontario and 2 kilometres due north of Melkior's Carscallen Gold property.

The Company purchased a 100% interest in the property. Portions of the property are subject to 2% NSR royalty of which the Company has the right to buy out half (1%) of the NSR for \$1,000,000 each.

Melkior Resources Inc.

Exploration on Big Marsh from May 31st to August 31st, 2014

On October 7th, 2013, Melkior obtained its exploration permit from the Ministry of Northern Development and Mines ("MNDM"), however, no field work was carried out on the Big Marsh Project during the three months ending in August 31st, 2014.

A field program consisting of drilling and prospecting is planned for 2014-2015 (\$20,800).

Bristol

(100% owned - gold)

Property description

The Bristol property covers 1.92 square kilometres for a total of 12 claim units in Bristol Township. It is located 25 kilometres due west-northwest of the City of Timmins, Ontario, 5 kilometres due north-northeast of Melkior's Carscallen Gold property and 800 metres due east of the Big Marsh property.

The Company holds a 100% interest in the property. The property was acquired through ground staking in 2009 and there is no NSR attached to the claims.

On July 11th, 2013, Melkior and Northcore Resources Inc. ("Northcore") modified and extended the option agreement to October 31st, 2016, whereby Northcore can acquire a 50% interest on the property by completing \$200,000 in exploration expenses before October 31st, 2016.

The original option agreement announced on August 19, 2009, required Northcore to undertake \$400,000 in exploration work prior to August 19th, 2013. Northcore issued 1,000,000 of its common share to the

Melkior Resources Inc.

Management's Discussion and Analysis

A field program consisting is planned for 2014-2015 (\$20,000).

Launay

(90% owned - gold)

Property description

The Launay property covers 55.59 square kilometres for a total of 136 claims. The property is located 80 kilometres north west of Val-D'Or, Quebec. Certain claims are subject to a 1% Net Smelter Return ("NSR") royalty.

In November 2013, Melkior entered into an option and joint venture agreement on the Launay Gold Project with Beaufield Resources Inc. ("Beaufield"). Under the terms of the agreement, Beaufield can earn an interest of up to 50 per cent in the project by incurring expenditures aggregating \$1.25 million over 5 years, with a minimum \$250,000 of exploration expenditures in the first year. As of August 31st, 2014, Beaufield has earned 10% and Melkior owns 90%.

Exploration on Launay from May 31st to August 31st, 2014

On July 22nd, 2014, Melkior provided results for a channel sampling program undertaken in June 2014 and the remaining three holes drilled in January 2014 on Zone 75. The drilling revealed continuous mineralization hosted in a granite with a strong albite alteration; previously reported intersections include 4.04 g/t gold over 15.52 metres (hole LAY-21-2013) and 6.20 g/t gold over 10.50 metres (LAY-20-2013).

Table 1 displays the results obtained for the 9 channels completed this summer. All channels were taken on Zone 75.

Table #1 – Launay channel results

Channel Number	Length (Metres)	Azimuth (Degrees)	From (Metres)	To (Metres)	Interval* (Metres)	Gold (g/t)
CHL-09-2014	11.60	090	0.00	11.60	11.60**	2.64
CHL-10-2014	6.00	090	0.00	6.00	6.00**	1.32
CHL-11-2014	1.60	090	0.00	1.60	1.60**	1.68
CHL-12-2014	7.00	090	0.00	7.00	7.00**	0.97
CHL-13-2014	3.00	090	1.00	2.00	1.00	1.47
CHL-14-2014	1.60	090	0.00	1.60	1.60**	2.90

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

CHL-16-2014	8.00	090	6.00	10.00	4.00**	1.44
CHL-17-2014	8.00	090	0.00	8.00	8.00**	1.38

*Reported intercepts are not true widths.

** Intersection is open

The channels consisted of gold bearing disseminated pyrite (about 2%) hosted in a strongly albitized granite. Most of the holes previously drilled on Zone 75 have intersected the albite-rich gold zone below the 50 metre level. The new surface gold intersections provide new data to add to the current database and confirmed the continuity of the mineralized zone up to the surface. The results also have shown that the mineralized zone is near vertical and affected by local faults. This information will be very important in planning the next drilling program on the property.

The results of three exploration holes drilled in January 2014 west of Zone 75, totaling 700 metres were also reported. The drilling discovered a new gold zone and also demonstrated the continuity of gold on the west part of Zone 75.

Table 2 displays the results obtained for the 3 winter holes. Hole LAY-26-2014 was collared at the bottom of a hill, about 150 metres west of Zone 75. Holes LAY-27-2014 and LAY-28-2014 were collared about 50 metres west of Zone 75.

Table #2 – Launay drill results

Hole Number	End of hole length (Metres)	Azimuth (Degrees)	Dip (Degrees)	From (Metres)	To (Metres)	Interval* (Metres)	Gold (g/t)
LAY-26-2014	391	130	-50	21.65	22.65	1.00**	1.32
				30.90	40.25	9.35	0.86
				49.30	51.60	2.30	0.73
				134.25	134.75	0.50**	1.24
				272.50	273.50	1.00**	1.30
LAY-27-2014	168	090	-50	23.00	37.10	14.10	1.89
				48.18	53.00	4.82	0.70
LAY-28-2014	141	090	-55	-	-	-	NSA***

*Reported drill intercepts are not true widths.

** Intersection is open

***NSA : No Significant Assay

Hole LAY-26-2014 was drilled 150 metres west of Zone 75 on an Induced Polarization (IP) anomaly. The IP anomaly was detected over two surveyed lines and explained in hole LAY-26-2014 by the presence disseminated pyrite (about 2%) with gold associated (0.86 g/t gold over 9.35 metres). This opens new possibilities of finding additional gold mineralization using IP as a geophysical tool elsewhere on the 3 km long property. The new zone requires follow-up.

The 2 last holes (LAY-27-2014 and LAY-28-2014) were drilled to test possible western extensions of Zone 75. The holes were collared about 50 metres west of Zone 75.

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

Long Lac

(100% owned – gold copper)

Property description

The LL1 Long Lac property covers 14.08 square kilometres for a total of 88 claim units in Laponen Lake Township. The LL3 Long Lac property covers 11.68 square kilometres for a total of 73 claim units in Castlebar and Klotz Lake Townships. LL1 Long Lac is located 20 kilometres due east-southeast of the town of LongLac, Ontario and LL3 LongLac is 30 kilometres due east. Both properties are accessible year round by paved roads and Highway 11.

Melkior staked the properties in November 2007. The Company holds a 100% interest on the two properties and the properties are not subject to any NSRs.

Claim status for LL1

Exploration on LL1 and LL3 from May 31st to August 31st, 2014

No field work was carried out on the LL1 and LL3 Projects during the three months ending in August 31st, 2014.

No work is planned for 2014-2015.

McFaulds Rim Nickel East

(100% - nickel, copper, PGE)

Property description

Melkior owns 100% interest in 979 claim units or 15,664 hectares in the East Rim Property in the "Ring of Fire" discovery area of North Central Ontario. The property is subject to a 2% NSR royalty half (1%) of which can be repurchased by the Company for \$2,000,000.

The property covers a large, significant regional gravity feature. The property is interpreted to be underlain by large volumes of dense mafic or ultramafic rocks of the type that can host significant nickel copper massive sulphide occurrences as demonstrated by the work of Noront Resources Ltd. ("Noront"). East Rim is located approximately 25 kilometres from the chromite discoveries by Noront and Freewest Resources Canada Inc., and 30 kilometres from the nickel discovery by Noront.

Airborne geophysics (magnetometer, electromagnetics, gravity) have defined a number of high priority massive sulphide type targets. Some of them were drilled in 2011 indicating positive geology but no potentially economic intersections.

Melkior Resources Inc.

Management's Discussion and Analysis

Trenching	-	-	-	-	-	-	-
Geophysics / Geochemistry	1738 line-kilometre airborne magnetic and electromagnetic (MEGATEM) survey, 725.74 line-kilometre versatile time domain electromagnetic (VTEM) survey	-	36.6 line-kilometre surface pulse electromagnetic survey (CRONE)	678 line-kilometre high-sensitivity aeromagnetic and gravite gradiometer (FALCON) survey	-	-	-

Exploration on McFaulds from May 31st to August 31st, 2014

No field work was undertaken on the McFaulds East Rim Project during the three months ending August 31st, 2014.

No work is planned for 2014-2015.

Ungava Delta - Kenty Quebec

(49% owned copper-nickel-platinum group)

Property description

Melkior owns 49% of this project with Glencore Xstrata (formally Falconbridge Ltd) holding 51%. In 1999, Falconbridge Ltd reported a resource of 817,000 tonnes 3.05% nickel, 1.26% copper and 2.65g/t platinum-palladium. This was not a NI 43-101 compliant and has not been verified by a qualified person. A 2004 drill hole on a new target intersected 99.77 metres 0.64% nickel and 0.26% copper. This is considered highly promising for expanding a resource on the property.

Considering the market conditions that prevailed in fiscal 2009 where it was difficult to finance an exploration program for the Ungava project located in the far north, the Company didn't expect to do extensive work on the property in the near future and consequently wrote-off the mining property costs and deferred exploration expenses in 2009. The Company does minimal work on the property and continues to write them off.

This is considered a significant asset with a high probability of future development.

Exploration on Delta-Kenty from May 31st to August 31st, 2014

No field work was undertaken on the Delta-Kenty Project during the three months ending August 31st, 2014.

No work is planned for 2014-2015.

Valliant Quebec
(100% owned copper-nickel-platinum group)

Property description

The Company map staked the Valliant property in April 2013. The Valliant property covers 13.61 square kilometres for a total of 33 claims. The property is located 25 kilometres east of the Ungava Delta-Kenty property. The claims are not subject to a NSR royalty.

Exploration on Valliant from May 31st to August 31st, 2014

No field work was undertaken on the Valliant Project during the three months ending August 31st, 2014.

No work is planned for 2014-2015.

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

Other properties in Ontario and Quebec

The Company holds a 100% interest in the Loveland property and Henderson property. The Loveland property is located in the Loveland Township. The property consists of 44 claim units and covers 7.04 square kilometres. The Henderson property consists of 20 claim units, covering 3.2 square kilometres in Raglan Township. During the summer 2010, First Nickel Inc. earned 50% interest.

The Company owns 35 claims in Vauquelin Township and 33 claims in Tiblemont Township located approximately 50km east of Val-d'Or, Quebec. Melkior acquired 3 claims in Tiblemont on May 12th, 2014, thereby increasing the Tiblemont property from 30 claims to 33. The three new claims were purchased for 200,000 common shares of Melkior and the vendor retained a 2% Net Smelter Return Royalty (NSR). Melkior can buy back 1% of the NSR for \$1,000,000. The vendor also retained the right to exploit, at his cost, surface gold (above bedrock) in overburden and residual rock from historical mining. Melkior holds a 2% NSR on this material. The properties and their deferred exploration expenses were written off in Fiscal 2005 since the exploration work for gold was not successful. Nevertheless, there is activity by others in the area hence the properties will be maintained in good standing. Together the Vauquelin and Tiblemont properties have approximately \$770,000 in excess work credits.

Melkior is not planning work on these properties.

Related party transactions

In the normal course of operations for the year ended August 31 2014:

- a) A company controlled by Jens E. Hansen (president and director) charged:
 - i) Professional fees relating to qualified exploration work amounting to \$24,303 (\$22,400 in 2013) and are capitalized in exploration and evaluation expenses;
 - ii) Management fees amounting to \$NIL (\$25,150 in 2013) expensed in professional and consulting fees;
 - iii) Rent totaling \$18,000 (\$22,500 in 2013) expensed in office expenses;
- b) Sabino Di Paola, the Chief Financial Officer and Corporate Secretary, charged professional fees of \$28,886 (\$19,162 in 2013)

Off-balance sheet arrangements

During the years ended August 31, 2014 and 2013, the Company did not set up any off-balance sheet arrangements.

Proposed Transactions

In the normal course of business, the Company evaluates property acquisition transactions and, in some cases, makes proposals to acquire such properties. These proposals, which are usually subject to Board and sometimes regulatory and shareholder approvals, may involve future payments, share issuances and property work commitments. These future obligations are usually contingent in nature and generally the Company is only required to incur the obligation if it wishes to continue with the transaction.

Annual Meeting of Shareholders

On February 21, 2014, the Company held its annual meeting of shareholders for the year ended August 31, 2013. All of the four directors standing for re-election, were unanimously re-elected and Raymond Chabot Grant Thornton, Chartered Professional Accountants, were unanimously re-appointed auditors of the Company.

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

Investor Relations Activities

The Company is not using an outside consultant to perform its investor relations activities. The tasks performed by an investor relations consultant are currently being performed by the management of the Company. There are no external contracts or commitments for Investor Relations as at August 31, 2014.

Risk factors

The following discussion reviews a number of important risks which management believes could impact the Company's business. There are other risks, not identified below, which currently, or may in the future exist in the Company's operating environment.

Exploration and Mining Risks

The business of exploration for minerals and mining involves a high degree of risk. Few properties that are explored are ultimately developed into producing mines. At present, there are no known bodies of commercial ore on the mineral properties of which the Company intends to acquire an interest and the proposed exploration program is an exploratory search for ore. Unusual or unexpected formations, formation pressures, fires, power outages, labor disruptions, flooding, cave-ins, landslides and the inability to obtain suitable or adequate machinery, equipment or labor are other risks involved in the conduct of exploration programs. The Company from time to time augments its internal exploration and operating expertise with due advice from consultants and others as required. The economics of developing gold and other mineral properties is affected by many factors including the cost of operations, variation of the grade of ore mined and fluctuations in the price of any minerals produced. There are no underground or surface plants or equipment on the Company's mineral properties, or any known body of commercial ore.

Titles to Property

While the Company has diligently investigated title to the various properties in which it has interest, and to the best of its knowledge, title to those properties are in good standing, this should not be construed as a guarantee of title. The properties may be subject to prior unregistered agreements or transfer, or native or government land claims, and title may be affected by undetected defects.

Permits and Licenses

The Company's operations may require licenses and permits from various governmental authorities. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration, development and mining operations at its projects.

Metal Prices

Even if the Company's exploration programs are successful, factors beyond the control of the Company may affect marketability of any minerals discovered. Metals prices have historically fluctuated widely and are affected by numerous factors beyond the Company's control, including international, economic and political trends, expectations for inflation, currency exchange fluctuations, interest rates, global or regional consumption patterns, speculative activities and worldwide production levels. The effect of these factors cannot accurately be predicted.

Competition

The mining industry is intensely competitive in all its phases. The Company competes with many companies possessing greater financial resources and technical facilities than itself for the acquisition of mineral interests as well as for recruitment and retention of qualified employee. The current markets put additional pressure on the availability of contract suppliers, equipment and personnel.

Environmental Regulations

The Company's operations are subject to environmental regulations promulgated by government agencies from time to time. Environmental legislation provides for restrictions and prohibitions of spills, release or emission of various substances produced in association with certain mining industry operations, such as

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

seepage from tailing disposal areas, which could result in environmental pollution. A breach of such legislation may result in imposition of fines and penalties. In addition, certain types of operations require submissions to and approval of environmental impact assessments. Environmental legislation is evolving in a manner, which means stricter standards, and enforcement, fines and penalties for non-compliance are more stringent. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has a potential to reduce the profitability of operations. The Company intends to fully comply with all environmental regulations.

First Nations

First Nations are increasingly making lands and rights claims in respect of existing and prospective resource projects on lands asserted to be First Nations traditional or treaty lands. Should a First Nations make such a claim in respect of Melkior's properties and should such claim be resolved by government or the courts in favor of the First Nations, it could materially adversely affect the business of the Company.

Many of Melkior's contractors and suppliers live and work in the local communities. The Company regularly consults with communities proximal to the Company's exploration activities to advise them of plans and answer any questions they may have about the activities.

Conflicts of Interest

Certain directors or proposed directors of the Company are also directors, officers or shareholders of other companies that are similarly engaged in the business of acquiring, developing and exploiting natural resource properties. Such associations may give rise to conflicts of interest from time to time. The directors of the Company are required by law to act honestly and in good faith with a view to the best interests of the Company and to disclose any interest, which they may have in any project or opportunity of the Company. If a conflict of interest arises at a meeting of the board of directors, any director in a conflict will disclose his interest and abstain from voting on such matter. In determining whether or not the Company will participate in any project or opportunity, the directors will primarily consider the degree of risk to which the Company may be exposed and its financial position at that time.

Stage of Development

The Company's properties are in the exploration stage and to date none of them have a proven ore body. The Company does not have a history of earnings or the provision of return on investment, and in future there is no assurance that it will produce revenue, operate profitably or provide a return on investment.

Industry Conditions

Mining and milling operations are subject to government regulations. Operations may be affected in varying degrees by government regulations such as restrictions on production, price controls, tax increase, expropriation of property, pollution controls or changes in conditions under which minerals may be mined. Milled or marketed. The marketability of minerals may be affected by numerous factors beyond the control of the Company, such as government regulations. The Company undertakes exploration in areas that are or could be the subject of native land claims. Such claims could delay work or increase exploration costs. The effect of these factors cannot be accurately determined.

Uninsured Hazards

Hazards such as unusual geological conditions are involved in exploring for and developing mineral deposits. The Company may become subject to liability for pollution or other hazards, which cannot be insured against or against which the Company may elect not to insure because of high premium costs or other reasons. The payment of any such liability could result in the loss of Company assets or the insolvency of the Company.

Future Financing

Completion of future programs may require additional financing, which may dilute the interests of existing shareholders. Access to future financing is not a certainty. The ongoing international financial crisis could have an impact.

Melkior Resources Inc.

Management's Discussion and Analysis

For the years ended August 31, 2014 and 2013

Key Employees

Management of the Company rests on a few key employees some of whom are officers of the Company, the loss of any of whom could have a detrimental effect on its operations.

Canada Revenue Agency and provincial agencies

No assurance can be made that Canada Revenue Agency or provincial agencies will agree with the Company's characterization of expenditures as Canadian exploration expenses or Canadian development expense or the eligibility of such expenses as Canadian exploration expense under the Income Tax Act (Canada) or any provincial equivalent.

Cost Increases

Costs for purchased services are constantly increasing and new regulations can represent an unanticipated cost increase.

Events after the reporting date

On October 20, 2014, the Company sold a total of 781 units, at a price of \$500 per unit, for total gross proceeds of \$390,500. Each unit consisted of 8,500 flow through and 1,500 non-flow through common shares and 10,000 common share purchase warrants, each warrant entitling the holder thereof to acquire one additional common share of the Company at a price of \$0.05 per share for a period of 24 months. All warrants issued in the private placement carry an accelerator clause to which takes effect after 12 months if the Company's stock trades above \$0.10 ("the triggering event"). The accelerator clause requires the warrants to be exercised within 30 days of the triggering event prior to the warrants expiring.

Forward looking information

Readers are cautioned that the MD&A contains forward-looking statements and that actual events may vary from management's expectations. Readers are encouraged to consult Melkior Resources' annual financial statements and corresponding notes to the financial statements for the year ended August 31, 2014 for additional details.

Melkior's disclosures are available on the Company's website at www.melkior.com. The annual financial statements and MD&A are presented in Canadian dollars and have been prepared in accordance with International Financial Reporting Standards ("IFRS"). This discussion addresses matters we consider important for an understanding of our financial condition and results of operations as of and for the year ended August 31, 2014.

This MD&A contains forward-looking statements and should be read in conjunction with the risk factors described in "Risks and Uncertainties" and the "Cautionary Note Regarding Forward-Looking Statements" at the end of this MD&A.
