

FACT SHEET (NOVEMBER 2011)

MELKIOR RESOURCES INC. TSX VENTURE - MKR

EXPLORATION COMPANY

QUÉBEC PROPERTY PORTFOLIO

LAUNAY GOLD PROJECT

Launay, Québec (100% owned)

- Potential for low grade, high tonnage deposit.
- Zone 75 historical intersections graded 6.92g/t Gold over 12.8 metres and 9.10g/t Gold over 7.0 metres. Non 43-101 resource calculation of 325,000 tonnes Gold at 3.03g/t (Boudrias, 2007)
- Principal Zone historical intersections graded 5.09g/t Gold over 9.42 metres and 7.2g/t Gold over 7.1 metres.
- 30 line kilometre Induced Polarization (IP) completed in 2010 and defined new drill targets.

DELTA KENTY NICKEL, COPPER, PGE PROJECT

Ungava, Québec (49% owned)

- Non 43-101 resource calculation of 817,600 tonnes at 3.05% Ni, 1.26% Cu, 0.22g/t Au, 1g/t Pt and 1.65% Pd (Falconbridge, 1997).
- Drill hole D4-108 (2004) intersected 99.77 metres Of 0.64% Ni, 0.26% Cu, demonstrating the potential for further discoveries.
- 2009 reprocessing and interpretation of historic data revealed areas for further geophysics and drilling.

MACLEOD LAKE MOLYBDENUM PROJECT

Otish, Québec (100% owned)

- Adjacent to Western Troy's high grade Molybdenum-Copper project, which is in its final feasibility stage.
- Located within the "Plan Nord" initiative announced by the Quebec Government, May 9th, 2011.

TRADING SYMBOL MKR.V

52 WEEK RANGE \$0.34 - \$0.075

SHARES ISSUED (MILLIONS)

Basic	110.96
Warrants	22.8
Options	9.7
Fully Diluted	143.4

WORKING CAPITAL \$1.0 Million

LAUNAY – GOLD

The **Launay Gold Project** consists of 144 claims (63.00 km²), located approximately 30 kilometres west of Amos, Québec and 60 kilometres northeast of Rouyn-Noranda, Québec. It is situated in the Abitibi Greenstone Belt, a region well known for its rich mineralized gold and VMS deposits.

Two zones located on the project are Zone 75 and the Principal Zone. Zone 75 consists of disseminated auriferous pyrite observed over a length of 400 metres with significant drill intersections of **6.92g/t gold over 12.8m** and **9.10g/t gold over 7.0m**.

The Principal Zone is a north-south shear zone 152m in length and 23m in width. Historic drill results returned **5.09g/t gold over 9.42m**, **3.37g/t gold over 6.86m**, **0.859g/t gold over 18m** and **0.537g/t gold over 25.5m**.

A 30 line kilometre induced polarization (IP) survey was completed in 2010 and defined areas for further drilling. Melkior is seeking a Joint Venture Partner to advance this project.

DELTA KENTY – NICKEL, COPPER, PGE

The **Delta Kenty Project** is in a Joint Venture with Xstrata Canada (51%) and Melkior Resources (49%). The property consists of 41 ground staked claims (6.56 km²) located about 75km west-southwest from the Xstrata airstrip at Donaldson.

The Property covers a Ni-Cu deposit containing a **non NI 43-101 compliant historical resource of 817,600 tonnes at 3.05% Ni, 1.26% Cu, 0.22 g/t Au, 1 g/t Pt and 1.65 g/t Pd** (1997 Falconbridge).

MACLEOD LAKE – MOLY

The **MacLeod Lake Project** consists of 109 claims (55.59 km²), located approximately 275 kilometres north of Chibougamau, Québec. The project is adjacent to Western Troy's high grade MacLeod Lake Copper/Molybdenum project.

On May 9, 2011, the Québec Government announced "**Plan Nord**," a major initiative to develop northern Quebec. The \$10 billion infrastructure spending includes the construction of the Otish Mountain Road which will pass within 70 kilometers of the project. Construction is expected to commence in late 2011 or early 2012.

Melkior has completed airborne magnetic and spectrometric surveys over the property.
